Permutation or Combination?

A college student is choosing 3 classes to take during the first, second, and third semesters from the 5 elective classes offered in his major. How many possible ways can the student schedule the three classes?

The order in which the classes are chosen does matter. Use a permutation.

$${}_5P_3 = \frac{5!}{(5-3)!} = \frac{5!}{2!} = 60$$

There are 60 ways that the student can schedule the three classes.
