precipitation and average annual temperature A region is deemed to be dry when there is a significant dearth of water resources to the point that plant and animal growth and development are hampered or prevented Arid regions are sometimes described as xeric or desertic because of their absence of flora Foundations of Arid Zone Ecology including geography physiography and Rajasthan s climate are some of the primary themes covered in this book Another is how to comprehend how deserts arise and are distributed The book also discusses how wastelands are distributed and how plants and animals may adapt to dry environments both of which are important in this topic Also we discuss the ecological effects of the Indira Gandhi Canal in this book
