Online Business Website Whether you're launching a product building an email list putting up a blog or any other website for that matter you need a healthy dose of traffic coming in And you can gather this traffic in various ways There is the search engine organic traffic social media traffic and the paid one called Pay Per Click Advertising But most free traffic methods take a lot of time to get them going plus it just doesn't convert all that well When we think about Paid Advertising Google Ads automatically pop up in our minds Every marketer worth their salt knows about Google Ads but many of them overlook Microsoft Ads formerly Bing Ads and its unique network of users With Google controlling the majority share of online traffic it's easy to write off Microsoft's Bing Ads as a search engine and PPC platform But Microsoft Advertising in particular has enormous potential for businesses of all sizes especially those with smaller budgets Microsoft Advertising presents a fantastic opportunity to generate search leads at a relatively lower cost and that's something all advertisers should take note of Microsoft Advertising's Audience Network Is A Hidden Gem That Brings A Lot Of Value Programmatic Offerings Microsoft Ads is Microsoft's self-serve advertising platform that allows advertisers to build campaigns and target users across Microsoft's Search and Audience Network Although it started off small Microsoft's search engine has continued to grow in Google's shadow and now according to ComScore Bing and its partners make up a combined 39% of the US desktop search market In fact if you're running a paid ads campaign it could be a mistake to ignore Bing and all the possibilities it can offer you Depending on what you're selling and who you're targeting Bing could be the missing piece of the puzzle for your marketing strategy Here's why As of March 2021 Bing hit 1.038 billion unique monthly visitors worldwide This figure includes all web visits from desktop and mobile There are approximately 82.6 million Bing searches per day There are 14.6 billion PC searches made on Bing every month In 2020 revenue for Microsoft search advertising amounted to 7.74 billion In the United States Bing ranked 24 in terms of traffic Seems like it's worth paying attention to right Google search statistics show that Google dominates the search engine market with Bing placing only second However this has not stopped Bing from amassing millions of unique PC users and generating billions of search queries This year people aren't going to be spending their money in brick and mortar shops restaurants bars and clubs like they did in the past In 2021 people are going to continue spending money online So there's no better time than now to present them with your offers But The Problem Is You Can't Just Throw Up An Ad And Expect To Be In The Profit Although Microsoft Ads is a very user friendly platform there are some details that you must pay attention to if you want to see success We Take Pride In Presenting Microsoft Ads Training Guide Microsoft Ads training encompassing everything you need to know to get started with Microsoft Ads and optimize your campaigns for maximum profits **Pinterest Profit Secrets 2021 Edition Training Guide** Laura Maya, 2021-10-30 Is Pinterest the New Google Google is a search engine That means whatever you're looking for you can Google it From obscure song lyrics to how to hem pants you can Google a term or phrase and find videos images and links to relative content Sort of like Google Pinterest is a visual search engine Pinterest uses a visual platform of images that stand alone as content but also

link to resources for deeper and richer information and engagement Like Google you can use key words and phrases to search for relative content Even better than Google you can save your links or pins to boards which are a helpful way to organize content Googling a word or phrase can generate the top ten or so articles images and other content relative to that search Many of the results are paid ads which rank higher than organic content Pinterest however can generate many more results from a search and each and every image offered can lead to a deeper dive experience about a subject or related topic In this way Pinterest may be better than Google for specific searches Can Pinterest be Used for Business When it comes to certain topics like recipes DIY and business topics Pinterest can be a gold mine As a user Pinterest is an excellent way to find relative content quickly and save it for use down the line If you re a content creator Pinterest is an excellent way to showcase your goods and services and attract customers easier and more effectively than you might have exclusively with Google It s also superior to social media platforms like Instagram that don t allow links on posts Pinterest is actually one of the largest drivers of traffic to websites in the world Many people think Pinterest is used mainly by women or worry their target audience isn t using the social media platform Both are false Pinterest demographics include all genders and ages and Pinterest has been found to be more effective at leading people to content than other platforms like Twitter Optimizing your Website and Your Pinterest Account Makes Sense Everyone knows website optimization is vital to being discovered on the web It doesn t make sense to invest resources in blogging or creating content if it s lost in the ether Most people take steps to optimize their sites for SEO or search engine optimization to increase the likelihood their content is found It s the same with Pinterest You can take simple steps to create images descriptions and links to your content so they land in front of more people and pop up under relevant searches It makes sense to use Pinterest for business as there is limitless potential to convert more browsers to buyers engage more customers and promote your business with people looking for what you have to offer
