

Introduction to Financial Management

Financial Management

A finance manager plays a vital role in a company's success. As cash flows into a company, the finance manager comes up with ways on how to use it daily and how it can help the company sustain its future generations. If finance is the center of all company activities, its management can be difficult because the finance manager has to be involved in every activity. The finance manager has to be aware of all the operations, marketing strategies, and overall strategic plans of the company.

In the past, a finance manager only involves himself/herself in simple bookkeeping tasks such as documentation, recordkeeping, preparation of financial reports, and payment of company bills (Van Horne, 2005). Through time, the task of a finance manager evolved, going deeply into the major aspects of a company's activities. This critical development resulted in the emergence of financial management.

Financial management is often mistakenly associated with accounting; however, financial management goes beyond accounting. Financial management is more concerned with raising, allocating, and controlling a company's funds. In times of financial trouble, the finance manager must find ways to control and improve a company's financial position. The following are common questions finance managers have to tackle and answer: Should the company borrow money? Is it a short- or long-term need? Did the company generate enough resources to fund its activities? Does the company need to issue additional shares of stocks?

If a company has enough money, the finance manager again has to be knowledgeable about the way the company should allocate funds in order to generate wealth for stockholders. The finance manager must determine the best course of action a company should take to maximize financial opportunities such as investing in short-term marketable securities, paying company debts, or paying dividends to stockholders.

A dividend policy decision is a significant aspect of financial management. The finance manager must be able to suggest what dividend policy a company should adopt. A company's dividend policy can be used to attract investors; it determines the kind of investors the company will have, as well as the kind of company it will be in the future.

Learning Objectives

At the end of this chapter, the students should be able to:

- discuss the primary objective of financial management;
- distinguish profit maximization from stockholders' wealth maximization;
- identify the primary functions of the finance manager;
- analyze problems that are applicable to finance;
- differentiate sole proprietorship, partnership, and corporation; and
- define the basic features, advantages, and disadvantages of the different forms of business organization.

Financial Management Chapter 1 solutions:

Financial Management [Revised Edition] John Smeur, 2019-08-05 This book introduces key concepts and methods in business financial management. It consists of two parts. Part one is structured around start up investments and key financing decisions facing entrepreneurs during their first year in business. The instruments examined include the investment budget, financing plan, the opening balance sheet, financial planning for profits and liquidity, the closing balance sheet, and a complete treatment of ratio analysis. Part two is about cost prices, budgeting, and variance analysis, profit calculation methods, and break even point, and finally calculations of the returns to alternative investment options. All of these subjects are treated in an accessible stepwise manner and are accompanied with illuminating examples. The combination of theoretical rigor and simple explanations makes the present volume indispensable for both students and entrepreneurs.

Financial Management Jim McMenamin, 2002-09-11 Finance is a notoriously difficult core subject for business undergraduates which many find difficult to understand. The area has been dominated by large and complex introductory texts often from the US which many lecturers find too detailed and unwieldy. This carefully developed and researched text will fill this gap by providing a succinct modular UK focused introduction to the subject of financial management. Quality controlled by an academic review panel, the content and approach has been rigorously developed to answer the needs of non finance students. The user friendly features and design will be of great appeal to the many undergraduates who find finance a difficult subject. Examples, models, formulas, and exercises are lucidly and clearly presented, supported by strong pedagogical features, learning objectives, worked examples, key learning points, further reading, practical assignments, references, case studies, and teacher's guide. This ensures that Financial Management will prove the most accessible text for business and finance students.

Financial Management and Analysis Workbook Pamela P. Peterson, Frank J. Fabozzi, Wendy D. Habegger, 2004-02-19 A comprehensive guide to understanding the world of financial management and analysis. This complement to the bestselling Financial Management and Analysis allows readers to self test their understanding before applying the concepts to real world situations. Pamela P Peterson PhD CPA Tallahassee FL is Professor of Finance at Florida State University. Wendy D Habegger Tallahassee FL is a PhD student in Finance at Florida State University.

Financial Management Information Systems Cem Dener, Joanna Watkins, William Leslie Dorotinsky, 2011-04-26 Financial Management Information Systems 25 Years of World Bank Experience on What Works and What Doesn't was prepared as an updated and expanded version of the FMIS review report drafted in 2003 to highlight the achievements and challenges observed during the design and implementation of Bank funded FMIS projects since 1984.

Financial Management Information Systems and Open Budget Data Cem Dener, Saw Young (Sandy) Min, 2013-10-11 This study is the first attempt to explore the effects of Financial Management Information Systems on publishing open budget data and improving budget transparency and develop some guidelines on relevant aspects. The findings of the study are expected to provide a comprehensive view of the current government practices.
