Financial Accounting and Management Control Fredrik Nilsson, Anna-Karin Stockenstr nd, 2015-02-20 This book is about financial accounting and management control and how these two information systems are related as well as how their objectives conflict At the most fundamental level the objective of financial accounting is to provide owners and funders with comparable information on a company s value creation The aim of management control on the other hand is to give the board

senior executives and employees unique information for strategy formulation and implementation One often mentioned negative effect is the risk of financial accounting affecting management control design and use making it less relevant for decision making at the company level The book provides an analysis of the complex relationship between financial accounting and management control The analysis is based on theoretical reasoning as well as several examples of how financial accounting standards affect not only the annual report but also the control system An interesting and perhaps unexpected conclusion is that management control seems to affect financial accounting almost as much as financial accounting affects management control These complex relationships which can influence the design and use of both financial accounting and management control are discussed in detail in this book *Institutions and Accounting Practices after the Financial Crisis* Victoria Krivogorsky, 2019-01-30 Financial globalization paired with the relaxation of constraints on capital flows between countries before the 2008 crisis increased merger activities among the World's largest stock exchanges The financial crisis of 2008 had a severe impact on the development of equity markets corporate financial stability and corporate governance and a multi step approach is needed to fully appreciate the causes and effects of this event This book engages the separate strands of literature to advance a more holistic understanding of whether and how the national institutional environments in selected countries around the world has been changed after the crisis *Institutions and Accounting Practices after the Financial Crisis International Perspective* sets out a framework for the analysis of institutional environments and accounting practices in in selected countries around the world during the pre crisis period followed by an examination of the impact of the crisis It scrutinizes the changing roles of debt and equity markets the shift in accounting practices and capital financing choices due to the economic downturn and the lessons that can be obtained from the financial crisis while considering the institutional architecture of international business environments This ongoing process of integration and globalization increases interdependence between world markets and allows shocks to propagate across national and continental lines making the understanding of international markets vitally important to American investors Aimed at primarily researchers academics and students in the fields of international accounting management and finance *Institutions and Accounting Practices after the Financial Crisis International Perspective* will additionally be of value to practitioners and policy makers supplying them with information regarding the changes in accounting practices and risk evaluation due to the crisis **Sustainable Investing: Problems And Solutions** Anatoly B Schmidt, 2024-08-08 This book covers multifaceted problems and their possible solutions in sustainable investing Written by experts in the field from academia and industry the book includes three main topics The general problems of sustainable investing are addressed in Part 1 They include the discussion of the concept of double materiality current ESG legal framework and its specifics for private equity the reviews of the sustainable investment indexes and funds as well as the machine learning techniques for deriving and analysing the ESG ratings Part 2 is devoted to the climate change It covers net zero portfolios being the means of reducing the investment carbon footprint

estimation of the Scope 3 greenhouse gas emissions venture investments in carbon dioxide removal technologies and an optimization problem of fuel production in carbon trading Finally Part 3 describes several sustainable investing strategies based on including sustainability indices and factors into the portfolio choice framework It also introduces new portfolio performance measures relevant for sustainable investing
