Side Effects and Complications Casey B. Mulligan, 2015-10-20 The Affordable Care Act will have a dangerous effect on the American economy That may sound like a political stance but it s a conclusion directly borne out by economic forecasts In Side Effects and Complications preeminent labor economist Casey B Mulligan brings to light the dire economic realities that have been lost in the ideological debate over the ACA and he offers an eye opening accessible look at the price American citizens will pay because of it Looking specifically at the labor market Mulligan reveals how the costs of health care under the ACA actually create implicit taxes on individuals and how increased costs to employers will be passed on to their employees Mulligan shows how as a result millions of workers will find themselves in a situation in which full time work adjusted for the expense of health care will actually pay less than part time work or even not working at all Analyzing the incentives or lack thereof for people to earn more by working more Mulligan offers projections on how many hours people will work and how productively they will work as well as how much they will spend in general Using the powerful tools of economics he then illustrates the detrimental consequences on overall employment in the near future Drawing on extensive knowledge of the labor market and the economic theories at its foundation Side Effects and Complications offers a crucial wake up call about the risks the ACA poses for the economy Plainly laying out the true costs of

the ACA Mulligan's grounded and thorough predictions are something that workers and policy makers cannot afford to ignore

Surviving the Fire Service Todd LeDuc, 2020-02-25 Firefighting is an inherently dangerous calling. Firefighters can be exposed to extreme environments from the firehouse to the fireground. Occupational health risks, occupational cancers, cardiovascular events, and behavioral health injuries continue to be the scourge of the fire service. *Surviving the Fire Service* contains vital information about cancer, cardiovascular risk, medical exams, and screening, nutrition, managing heat stress, women in the fire service, human performance, and the tactical athlete and fireground survival. This book addresses how to manage and reduce risks in the fire service and use the tools you need to implement within your fire department to address each of these threats. Edited by Chief Todd J. LeDuc, retired.
