#### **Background and Introduction to Gattaca**

Gattaca is a 1997 American dystopian science fiction film written and directed by Andrew Niccol in his feature directorial debut. The film presents a future society driven by eugenics where children are conceived through genetic selection to ensure they possess the best hereditary traits of their parents. The film centers on Vincent Freeman, played by Hawke, who was conceived outside the eugenics program and struggles to overcome genetic discrimination as he sets his dreams of going into space.

The film draws on concerns over reproductive technologies that facilitate eugenics, and the possible consequences of such technological developments for society. It also explores the idea of destiny and the ways in which it can and does govern lives. Characters in Gattaca continually battle both with society and with themselves to find their place in the world and who they are destined to be according to their genes. The film is noted for its unique use of color. Cinematographer Shawnee Smith employed vibrant gold, green, and electric blue tones throughout the film, and shot the film in Super 35mm format, which adds an enlarged layer of grain.

The film was shot under the working title *The Eighth Day*, a reference to the seven days of creation in the Bible. However, by the time its release was scheduled for the fall of 1997, the Belgian film *Le huitième jour* had already been released in the US under the title *The Eighth Day*. As a result, the film was retitled *Gattaca*, which takes inspiration from the letters G, A, T, and C, derived from four of the nucleobases of DNA: guanine, adenine, thymine and cytosine. The film tanked at the box office and only earned a domestic total of \$32.3 million against a reported budget of \$36 million. It was a 1997 nominee for the Academy Award for Best Art Direction and the Golden Globe Award for Best Original Score. A follow-up series was in development at Showtime, but has been cancelled as of 2003. Gattaca currently holds an 82% fresh rating on Rotten Tomatoes with the following critics' consensus: "Intelligent and scientifically provocative, Gattaca is an absorbing sci-fi drama that poses important interesting ethical questions about the nature of science." **The Human Genome Project in College Curriculum** Aine Donovan, Ronald Michael Green, 2008. Begun formally in 1990, the U.S. Human Genome Project's HGP goals were to identify all the 20,000 to 25,000 genes in human DNA, determine the sequences of the three billion chemical base pairs that make up human DNA, store this information in databases, improve tools for data analysis, and transfer related technologies to the private sector. It was the first large scientific undertaking to address potential issues that arose from project data and opened up vast possibilities for the use of genetic data and the alteration of our genetic makeup. This volume is the first to address the diverse range of ethical issues arising from the HGP and enables professors to bring this critically important topic to life in the classroom.

**Emerging Evangelicals** James S. Bielo, 2011. The Emerging Church movement developed in the mid 1990s among primarily white urban middle class pastors and laity who were disenchanted with America's conservative Evangelical sub culture. It is a response to the increasing divide between conservative Evangelicals and concerned critics who strongly oppose what they consider overly slick corporate and consumerist versions of faith. A core feature of their response is a challenge to traditional congregational models, often focusing on new church plants and creating networks of related house churches. Drawing on three years of ethnographic fieldwork, James S. Bielo explores the impact of the Emerging Church movement on American Evangelicals. He combines ethnographic analysis with discussions of the movement's history, discursive contours, defining practices, cultural logics, and contentious interactions with conservative Evangelical critics to rethink the boundaries of Evangelical as a category. Ultimately, Bielo makes a novel contribution to our understanding of the important changes at work among American Protestants and illuminates how Emerging Evangelicals interact with the cultural conditions of modernity, late modernity, and visions of postmodern Christianity. James S. Bielo is Visiting Assistant Professor of Anthropology at Miami University in Oxford, OH. He is the author of *Words Upon the Word: An Ethnography of Evangelical Group Bible Study* (NYU Press) and editor of *The Social Life of Scriptures: Cross cultural Perspectives on Biblicalism*.
