Dimitris Metaxas, Leon Axel, Gabor Fichtinger, Gabor Szekely, 2008-10-30 The 11th International Conference on Medical
Imaging and Computer Assisted Intervention MICCAI 2008 was held at the Helen and Martin Kimmel Center of New York
University New York City USA on September 6 10 2008 MICCAI is the premier international conference in this domain with
depth papers on the multidisciplinary elds of biomedical image computing and analysis computer assisted intervention and
medical robotics The conference brings together biological scientists clinicians computer scientists engineers
mathematicians physicists and other interested researchers and o ers them a forum to exchange ideas in these exciting and
rapidly growing elds The conference is both very selective and very attractive this year we ceived a record number of 700
submissions from 34 countries and 6 continents from which 258 papers were selected for publication which correspond to a s
cess rate of approximately 36% Some interesting facts about the distribution of submitted and accepted papers are shown
graphically at the end of this preface The paper selection process this year was based on the following procedure which
included the introduction of several novelties over previous years 1 A Program Committee PC of 49 members was recruited by
the Program Chairs to get the necessary body of expertise and geographical coverage All PC members agreed in advance to
participate in the nal paper selection process 2 Key words grouped in 7 categories were used to describe the content of the
submissions and the expertise of the reviewers Artificial Intelligence and Imaging for Oncology Poonam Yadav, Zhimin Li

, Yuxiang Zhou, 2025-02-18 Recent progress in artificial intelligence AI and advanced imaging techniques have brought about
exciting diagnostic and therapeutic opportunities in oncology More and more state of the art CT PET and MRI imaging
techniques are being applied to tumor imaging and new interdisciplinary field such as MR LINAC is booming We feel there s
an urgent need to organize a Research Topic to highlight the application of AI and imaging for various oncology branches
such as radiation therapy as we are witnessing an accelerated integration of imaging and therapy to improve the care of
cancer patients Imaging has also been the backbone of the oncology world It is used for diagnosis as well as planning MRI
has a superior soft tissue contrast but lacks the electron density information for the dose calculation alternative approaches
use synthetic CT for dose calculation The development of the MRI guided system and online adaptation can be considered as
the bridge between many specialties starting from learning about MRI safety by the therapy physicist to the use of AI for

robust planning Active research is done to improve the images advanced MRI techniques Nuclear medicine and PET MRI synthetic images CBCT for dose calculation for clinical workflows However all these topics have a lot of room for exploration
