

The Firestone **TEMPA SPARE** ...a revolutionary space-saving spare tire

TEMPA SPARE

is a special tire designed to let you finish a trip and obtain a replacement tire, if needed, at your convenience.

The **TEMPA SPARE** is smaller and thinner than a regular tire, which means you have more space in your trunk for luggage, golf clubs, children's equipment, etc.

Instructions for Use

Remove **TEMPA SPARE** from trunk.

Reinflate flat tire with **TEMPA SPARE**.

Your car is now ready for temporary use.

Important Safety Information

Any tire, no matter how well constructed, may fail as a result of punctures, impact damage, improper inflation, overloading or other conditions resulting from use. Tire failure may result in a risk of serious personal injury or property damage. To reduce the risk of tire failure, we strongly recommend you read and heed the following Safety Information.

TIRE INFLATION

Always keep the recommended air pressure in your tires. This is an important requirement for tire safety and mileage. Your vehicle tire placard or owner's manual will tell you the recommended air pressure. On some vehicles, the recommended front and rear tire pressures will be different. Your Firestone store or tire dealer will be happy to point this out to you.

Safety warning: Driving on tires with too little air pressure is dangerous. Your tires will get overheated. This can cause a sudden tire failure leading to serious personal injury.

Underinflation may also:

1. damage the tire
2. adversely affect vehicle handling
3. reduce tire life
4. increase fuel consumption

Safety warning: Driving on tires with too much air can be dangerous. The tires are more likely to be cut, punctured, or broken by sudden impact. Serious personal injury could result. Consult your vehicle tire placard or owner's manual for the recommended inflation.

Safety warning: Never inflate a tire unless it is secured to the vehicle or a tire mounting machine. Inflating an unsecured tire is dangerous. If it bursts, it could be fired into the air by explosive forces, resulting in serious personal injury.

TIPS FOR SAFE TIRE INFLATION

- Check your air pressure with a gauge when the tires are "cold." The tires are "cold" when your vehicle has been driven less than a mile at moderate speed after being stopped for three or more hours.
- Check your tire air pressure at least once a month and before long trips. Be sure to use an accurate pressure gauge.
- Never release air from a hot tire in order to reach the recommended cold tire pressure. Normal driving causes tires to run hotter and air pressure to increase. If you release air when your tires are hot, you may dangerously underinflate your tires.
- If you must add air when your tires are hot, add four pounds per square inch (psi) (29 kPa) above the recommended cold air pressure. Recheck the inflation pressure when the tire is cold.
