An Age of Accountability John L. Rury, 2023-10-13. An Age of Accountability highlights the role of test-based accountability as a policy framework in American education from 1970 to 2020. For more than half a century, the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment. The theory of change embedded in almost all test-based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools. This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps, which repeatedly failed to materialize. But even after very clear disappointments, no other policy framework has emerged to challenge its hegemony. The American public today has little confidence in institutions to improve the quality of goods and services they provide, especially in the public sector. As a consequence, many Americans continue to believe that accountability remains a vital necessity, even if educators and policy scholars disagree. *Future Directions of Educational Change* Helen Malone, Santiago Rincón-Gallardo, Kristin Kew, 2017-08-09. Future Directions of Educational Change brings

together timely discussions on social justice professional capital and systems change from some of the leading scholars in the field of education Engaging in theory and evidence based debates covering issues such as literacy education whole system reform and teacher leadership this volume argues that quality and equity are equally important in reshaping existing education systems both within the United States and globally The authors offer contextual analyses of current educational research and practice while looking toward the future and offering thought provoking arguments for challenging and rectifying the systemic inequalities within education today
