mortality became something calculable predictable manageable and even profitable Drawing on a range of examples including the criminalization of migrant labor medical tourism life insurance and health care he explores how today we can no longer presume that all bodies undergo the same processes of life death fertility and mortality He goes on to develop the concept of shared mortality among vulnerable populations and examines forms of capital exploitation that have emerged around death and the reproduction of labor Positioned at the intersection of two fields the political economy of labor and the philosophy of mortality Dead Labor builds on Marx s notion that death and truncated life is a constant factor in the processes of labor Considering premature death also as a biopolitical and bioeconomic concept Tyner shows how racialized and gendered bodies are exposed to it in unbalanced ways within capitalism and how bodies are then commodified made surplus and redundant and even disassembled in order to accumulate capital
