Daily Graphic Ransford Tetteh, 2014-03-22 **Alternative Models of Addiction** Hanna Pickard, Serge H.

Ahmed, Bennett Foddy, 2015-12-07 For much of the 20th century theories of addictive behaviour and motivation were polarized between two models The first model viewed addiction as a moral failure for which addicts are rightly held responsible and judged accordingly The second model in contrast viewed addiction as a specific brain disease caused by neurobiological adaptations occurring in response to chronic drug or alcohol use and over which addicts have no choice or control As our capacity to observe neurobiological phenomena improved the second model became scientific orthodoxy increasingly dominating addiction research and informing public understandings of addiction More recently however a dissenting view has emerged within addiction research based partly on new scientific research and partly on progress in philosophical and psychological understandings of relevant mental phenomena This view does not revert to treating addiction as a moral failure but nonetheless holds that addictive behaviour is fundamentally motivated by choice and subject to at least a degree of voluntary control On this alternative model of addiction addictive behaviour is an instrumental means to ends that are desired by the individual although much controversy exists with respect to the rationality or irrationality of these ends the degree and nature of the voluntary control of addictive behaviour and motivation the explanation of the difference between addictive and non addictive behaviour and motivation and lastly the extent to which addictive behaviour and motivation is correctly characterised as pathological or diseased This research topic includes papers in the traditions of neuroscience psychology philosophy law and social science that explore alternative understandings of addiction JKSSB Accounts Assistant (Finance Department) Exam Guide 2021 Arihant Experts, 2021-02-21 Review of the Department of Energy's Plans for Disposal of Surplus Plutonium in the Waste Isolation Pilot Plant National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Nuclear and Radiation Studies Board, Committee on Disposal of Surplus Plutonium at the Waste Isolation Pilot Plant, 2020-07-01 In 2018 the National Academies of Sciences Engineering and Medicine issued an Interim Report evaluating the general viability of the U S Department of Energy's National Nuclear Security Administration's DOE NNSA's conceptual plans for disposing of 34 metric tons MT of surplus plutonium in the Waste Isolation Pilot Plant WIPP a deep geologic repository near Carlsbad New Mexico It provided a preliminary assessment of the general viability of DOE NNSA's conceptual plans focused on some of the barriers to their implementation This final report addresses the remaining issues and echoes the recommendations from the interim study *Organization and Administration of Physical Education* Jayne D.
