

Semi Detailed Lesson Plan in Mathematics VII (2nd Quarter)

Date: September 17, 2018

Content Standard:

Demonstrates understanding of key concepts of algebraic expressions, the properties of real numbers as applied in linear equations, and inequalities in one variable.

Performance Standard:

Is able to model situations using oral, written, graphical, and algebraic methods in solving problems involving algebraic expressions, linear equations, and inequalities in one variable.

I. Learning Objectives

At the end of the lesson, the students will be able to:

- adds and subtracts polynomials
- The learner will add polynomials and be able to teach at least 2 classmates the process they used to come to a solution.
- Gain Self-confident and Appreciate Numbers

II. Subject Matter

- Topic:
- Sub Topic: Addition and Subtraction of Polynomial
- Strategies: Peer Teaching/ Reciprocal Teaching and Lecture Method
- Materials: Chalks, Laptop for PowerPoint presentation
Class-set of foldables, Ticket-out worksheets
- References: Curriculum guide p 173, *Adding and subtracting polynomials: Anticipatory set*. Creative Commons. Retrieved from: <http://www.fishing4tech.com/adding-and-subtracting-polynomials.html>

III. Development of the Lesson

A. Routinary Activity

- Classroom Management and Greetings
- Checking of Attendance and Grooming

B. Preparatory Activities

- Drill- Presentation using PowerPoint

Direction: Express the following fractions in lowest term.

- $-9 + (-18)$
- $(-9) - (-4) =$
- $6 - (-4) =$
- $3 + (-8) =$
- $7 + (-5) =$
- $(-4) + (-2) =$

- Review (Students will be asked)

- What is polynomial?
- What is the root word mono, bi and tri- means?
- Students will identify the different polynomial as a monomial, binomial or trinomial:

- $mn - 3mn + m$
- $2a - b$
- $7abc$
- $7 + u + v$
- $2p^2 - p - k$

- $ax^2 + bx - 7$
- $-3mn + 2m$
- $(x) 1 + a + z$
- $(x) 1 + a + z$
- $a + ab - b^2$

Proposed Teaching

- I chose the reciprocal teaching strategy because it allows the students to use their knowledge to teach their peers in an attempt to cement their learning.
- It is the most effective strategy because it goes beyond just explaining the steps to solve the problem but it allows the students to generate questions and apply the material to situations that matter to them.
- Con- When students get into pairs, it is possible they may not use their time effectively and they may have conversations that are off topic. I can combat this by providing the students with a timed guideline of how to spend their time.

Lesson Plan Polynomials:

Every Math Learner, Grades 6-12 Nanci N. Smith, 2017-02-02 As a secondary mathematics teacher you know that students are different and learn differently And yet when students enter your classroom you somehow must teach these unique individuals deep mathematics content using rigorous standards The curriculum is vast and the stakes are high Is differentiation really the answer How can you make it work Nationally recognized math differentiation expert Nanci Smith debunks the myths revealing what differentiation is and isn't In this engaging book Smith reveals a practical approach to teaching for real learning differences You'll gain insights into an achievable daily differentiation process for ALL students Theory lite and practice heavy this book shows how to maintain order and sanity while helping your students know understand and even enjoy doing mathematics Classroom videos teacher vignettes ready to go lesson ideas and rich mathematics examples help you build a manageable framework of engaging sense making math Busy secondary mathematics teachers coaches and teacher teams will learn to Provide practical structures for assessing how each of your students learns and processes mathematics concepts Design implement manage and formatively assess and respond to learning in a differentiated classroom Plan specific standards aligned differentiated lessons activities and assessments Adjust current instructional materials and program resources to better meet students needs This book includes classroom videos in depth student work samples student surveys templates before and after lesson demonstrations examples of 5 day sequenced lessons and a robust companion website with downloadables of all the tools in the books plus other resources for further planning Every Math Learner Grades 6-12 will help you know and understand your students as learners for daily differentiation that accelerates their mathematics comprehension This book is an excellent resource for teachers and administrators alike It clearly explains key tenants of effective differentiation and through an interactive approach offers numerous practical examples of secondary mathematics differentiation This book is a must read for any educator looking to reach all students Brad Weinhold Ed D Assistant Principal Overland High School *Basic Algebra and Geometry Made a Bit Easier Lesson Plans* Larry Zafran, 2010 This is the fifth book in the Math Made a Bit Easier series by independent math tutor Larry Zafran It contains 50 abridged lesson plans covering basic algebra and geometry for a target audience of tutors parents and homeschoolers Each lesson plan includes all of the components of a typical classroom lesson such as aim motivation warm up exercises demonstrative examples questions for thought and discussion and connections to earlier and later material This book is intended to be used in strict conjunction with the fourth book of the series Basic Algebra and Geometry Made a Bit Easier Concepts Explained in Plain English The book assumes that the instructor actually knows the material him/herself but could benefit from having a general guideline to follow The author makes a point of identifying the concepts which most students tend to find easy or difficult including suggestions on how to help with the latter The book includes an introduction describing how the book can be put to best use as well as a section on how to effectively work with

students who are struggling with the material The author explains that for the vast majority of students the root of the problem can be traced back to never having fully mastered basic math concepts and skills The book's lessons make frequent reference to reviewing earlier books in the series as needed so that the student masters all of the prerequisite material

41 Active Learning Strategies for the Inclusive Classroom, Grades 6-12 Diane Casale-Giannola, Linda Schwartz Green, 2012-06-27 Bueller Keys to engaging secondary students Motivating adolescents to learn can be a challenge Often distracted and easily bored these kids are also critical thinkers capable of thriving in the classroom while learning 21st century skills How do we hold their attention and develop their abilities Research shows that all students regardless of learning style disability category or language difference learn more effectively when they are engaged in active learning 41 Active Learning Strategies for the Inclusive Classroom shows teachers how to help all students achieve positive learning outcomes The authors provide a compilation of strategies that serve as blueprints for instructional design and directions for using them across a variety of content areas The many benefits of active learning include A more engaged and interactive classroom Increased self directed learning Development of higher order thinking skills such as analysis synthesis evaluation Improved reading discussion and writing competencies Each strategy includes materials directions sample applications across content areas ways to support students with learning differences and sample vignettes New teacher requirements and raised expectations to meet higher standards for all students might make the teaching challenge look daunting The authors understand your journey and will walk you through the process step by step so that you are fully prepared to achieve success

U.S. Doctorates in Mathematics Education Robert E. Reys, John A. Dossey, 2008 Mathematics education in the United States will be shaped at all levels by those who hold doctorates in the field As professors they influence the structure and content of university programs in mathematics education where future teachers are prepared As scholars they engage in research and lead us to a deeper and better understanding of the field This book is a detailed study of doctoral programs in mathematics education It stems from a national conference sponsored by the National Science Foundation It involved participants from across the United States as well as Brazil Japan Norway and Spain and followed up the work of an earlier conference published in One Field Many Paths U S Doctoral Programs in Mathematics Education Volume 9 in this series The book as was the conference is organized around several major questions including What is the core knowledge for doctoral students in mathematics education What are the important issues and challenges in delivering doctoral programs What can we learn about doctoral preparation by comparisons with other countries What effect would accreditation of doctoral programs in mathematics education have on the profession What next steps need to be addressed now The book documents the wide range of ideas about doctoral programs in mathematics education and their varied features It provides readers with current visions and issues concerning doctoral studies in the field and serves as a reminder that establishing stewards of the discipline of mathematics education is a continuing challenge Turning on Learning Carl A. Grant, Christine E.

Sleeter,2008-10-28 With a wealth of ready to use lesson plans for grade levels K 12 covering a variety of subject areas Turning on Learning Fifth Edition shows students how to apply the principles of multicultural education in the classroom This practical lesson based companion to Sleeter and Grant s Making Choices for Multicultural Education Five Approaches to Race Class and Gender features additional lesson plans and new resource material along with updates of existing lesson plans

Algebra Iglobal Educational Services,2017-05-08 Tutoring is beginning to get the respect and recognition it deserves More and more learners require individualized or small group instruction whether it is in the classroom setting or in a private tutoring setting either face to face or online It is conceived and created for tutors and educators who desire to provide effective tutoring either in person or online in any educational setting including the classroom Rather than provide a specific curriculum to follow Algebra High School Math Tutor Lesson Plan Series provides a blueprint to design effective tutoring lessons that are aligned with the Dr Holland Johnson s Session Review Framework Tutor evaluators and coaches are able to analyze tutoring sessions and coach tutors when utilizing the Dr Holland Johnson s Lesson Plan Blueprint for Tutors In each lesson plan learners have an opportunity to focus on real world connections vocabulary and practice the math concepts learned in the tutoring sessions in the appropriate amounts to learn and retain the content knowledge Tutors will have an opportunity to provide direct and guided instruction while learners practice concepts on their own during independent instruction Each lesson plan comes with a mini assessment pertaining to the math concepts learned in the specific tutoring session Depending on the learner s academic needs the tutor or teacher will deem when it is appropriate to administer the mini assessment For online tutoring sessions or as an online option to take the mini assessment tutors and teachers can upload these mini assessments to be completed online in their choice of an online assessment tool

Mathematics in Middle and Secondary School Alexander Karp,Nicholas Wasserman,2014-11-01 The experience and knowledge acquired in teacher education courses should build important fundamentals for the future teaching of mathematics In particular experience in mathematical problem solving and in planning lessons devoted to problem solving is an essential component of teacher preparation This book develops a problem solving approach and is intended to be a text used in mathematics education courses or professional development for pre service or in service middle and secondary school teachers It can be used both in graduate and undergraduate courses in accordance with the focus of teacher preparation programs The content of the book is suited especially for those students who are further along in their mathematics education preparation as the text is more involved with mathematical ideas and problem solving and discusses some of the intricate pedagogical considerations that arise in teaching The text is written not as an introduction to mathematics education a first course but rather as a second or probably third course The book deals both with general methodology issues in mathematics education incorporating a problem solving approach Chapters 1 6 and with more concrete applications within the context of specific topics algebra geometry and discrete mathematics Chapters 7 13 The

book provides opportunities for teachers to engage in authentic mathematical thinking The mathematical ideas under consideration build on specific middle and secondary school content while simultaneously pushing the teacher to consider more advanced topics as well as various connections across mathematical domains The book strives to preserve the spirit of discussion and at times even argument typical of collaborative work on a lesson plan Based on the accumulated experience of work with future and current teachers the book assumes that students have some background in lesson planning and extends their thinking further Specifically this book aims to provide a discussion of how a lesson plan is constructed including the ways in which problems are selected or invented rather than the compilation of prepared lesson plans This approach reflects the authors view that the process of searching for an answer is often more important than the formal result **Polynomial**

Root-finding and Polynomiography Bahman Kalantari,2009 This book offers fascinating and modern perspectives into the theory and practice of the historical subject of polynomial root finding rejuvenating the field via polynomiography a creative and novel computer visualization that renders spectacular images of a polynomial equation Polynomiography will not only pave the way for new applications of polynomials in science and mathematics but also in art and education The book presents a thorough development of the basic family arguably the most fundamental family of iteration functions deriving many surprising and novel theoretical and practical applications such as algorithms for approximation of roots of polynomials and analytic functions polynomiography bounds on zeros of polynomials formulas for the approximation of Pi and characterizations or visualizations associated with a homogeneous linear recurrence relation These discoveries and a set of beautiful images that provide new visions even of the well known polynomials and recurrences are the makeup of a very desirable book This book is a must for mathematicians scientists advanced undergraduates and graduates but is also for anyone with an appreciation for the connections between a fantastically creative art form and its ancient mathematical foundations **E-math Iv Tm' 2007 Ed.(advanced Algebra & Trigonometry) , Teaching Secondary and Middle**

Teaching Mathematics at a Technical College Zachary Youmans, 2022-11-25 Not much has been written about technical colleges especially teaching mathematics at one Much had been written about community college mathematics This book addresses this disparity Mathematics is a beautiful subject worthy to be taught at the technical college level The author sheds light on technical colleges and their importance in the higher education system Technical colleges area more affordable for students and provide many career opportunities These careers are becoming or have become as lucrative as careers requiring a four year degree The interest in technical college education is likely to continue to grow Mathematics like all other classes is a subject that needs time energy and dedication to learn For an instructor it takes many years of hard work and dedication just to be able to teach the subject Students should not be expected to learn the mathematics overnight As instructors we need to be open honest and put forth our very best to our students so that they can see that they are able to succeed in whatever is placed in front of them This book hopes to encourage such an effort A notable percentage of students who are receiving associate degrees will go through at least one of more mathematics courses These students should not be forgotten about their needs are similar to any student who is required to take a mathematics course to earn a degree This book offers insight into teaching mathematics at a technical college It is also a source for students to turn toward when they are feeling dread in taking a mathematics course Mathematics instructors want to help students succeed If they put forth their best effort and us ours we can all work as one team to get the student through the course and onto chasing their dreams Though this book focuses on teaching mathematics some chapters expand to focus

on teaching in general The overall hope is the reader will be inspired by the great work that is happening at technical colleges all around the country Technical college can be should be and is the backbone of the American working class
