

Comparing and Ordering Fractions

3rd–5th Grade

Objective

CCSS Math/Number and Operations-Fractions: 4.NF.2

- Extend understanding of fraction equivalence and ordering.
 2. Compare two fractions with different numerators and different denominators (e.g., by creating common denominators or numerators, or by comparing to a benchmark fraction such as $\frac{1}{2}$). Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with symbols $>$, $=$ or $<$, and justify the conclusions (e.g., by using a visual fraction model).

Materials Needed

- *Pizza Fractions* by Jerry Pallotta
- Chalkboard, whiteboard or document camera
- Fraction Pizza templates
- Comparing Fractions practice page and answer sheet
- Comparing Fractions activity card and recording sheet
- Comparing Fractions spinners and answer key
- Paper clips
- Pencils
- Pennies or other small objects (to use as game markers)

Preparation

Before teaching this lesson, you may want to introduce students to the concept of equivalent fractions. (Please visit http://www.lakeshorelearning.com/general_content/free_resources/teachers_corner/lesson_plans/equivalentFraction.jsp for a sample lesson.)

Introduction

Read aloud *Pizza Fractions* by Jerry Pallotta to give students a visual representation of fractions.

Procedure

1. Explain to students that they are going to compare and order fractions.
2. Print out and display the first two Fraction Pizza templates on the chalkboard, whiteboard or document camera.
3. Point out that the two pizzas are the same size, but the first pizza is cut into four slices and the second pizza is cut into eight slices. Ask students to identify which pizza has larger slices.
4. Say, "Imagine you are very hungry and someone offers you one slice of pizza. Would you rather have one slice of this pizza that is cut into fourths?" (Circle one of the slices on the first pizza and write " $\frac{1}{4}$ " beneath the pizza.) Then ask, "Or would you rather have one slice of this pizza that is cut into eighths?" (Circle one of the slices on the second pizza and write " $\frac{1}{8}$ " beneath the pizza.)

Research and Practice in Mathematics Education Lynn C. Hart, Alice S. Alston, Aki Murata, 2011-01-11 Lesson study is a professional development process that teachers engage in to systematically examine their practice with the goal of becoming more effective. Originating in Japan, lesson study has gained significant momentum in the mathematics education community in recent years. As a process for professional development, lesson study became highly visible when it was proposed as a means of supporting the common practice of promoting better teaching by disseminating documents like standards, benchmarks, and nationally validated curricula. While the body of knowledge about lesson study is growing, it remains somewhat elusive and composed of discrete research endeavors. As a new research area, there is no coherent knowledge base yet. This book will contribute to the field by bringing the work of researchers and practitioners together to create a resource for existing work. This book describes several aspects of Lesson Study; amongst others, it gives an historical overview of the concept, it addresses issues related to learning and teaching mathematics, it looks at the role of the teacher in the process. The last two sections of the book look at how Lesson Study can be used with preservice mathematics teachers and at university mathematics methods teaching.

Digital Teaching Platforms Christopher Dede, John Richards, 2012-04-06 The Digital Teaching Platform (DTP) brings the power of interactive technology to teaching and learning in classrooms. In this authoritative book, top researchers in the field of learning science and educational technology examine the current state of design and research on DTPs, the principles for evaluating them, and their likely evolution as a dominant medium for educational improvement. The authors examine DTPs in light of contemporary classroom requirements, as well as current initiatives such as the Common Core State Standards, *Race to the Top*, and the 2010 National Educational Technology Plan.

Teaching by Design in Elementary Mathematics, Grades 4-5 Melinda Leong, Jennifer Stepanek, Linda Griffin, Lisa Lavelle, 2010-12-01 Strengthen your mathematics lessons through collaborative planning. *Teaching by Design in Elementary Mathematics* is a series of comprehensive professional development guides that help teachers investigate how students learn. Grounded in the latest research, this book is one of three volumes focused on grade-appropriate number and operations topics aligned with the Common Core State Standards. The capstone activity of each book guides the group through the co-creation and implementation of a prototype lesson. The teacher teams then evaluate the impact of the lesson on student learning and work together to revise it for maximum effectiveness. Through the process, teachers develop deeper content knowledge of important mathematical concepts, improved understanding of how students learn these mathematical ideas, a stronger foundation for developing effective lessons and improving instruction, enhanced collaboration skills. Each volume includes a large assortment of reproducible handouts as well as built-in facilitation notes. Teachers will also find helpful resources that address the issue of finding time for school-based professional development and teacher collaboration.
