

Introduction to Sequences

2 4 6 8 10 12 14 16

Look at this set of numbers.

3, 6, 9, 12, 15, 18, 21, 24, 27 and 30.

When a set of numbers follow a pattern, we call that set a **sequence**.

Which of these sets of numbers could be called a sequence?

- 7, 14, 21, 28, 35, 42
Yes—each number is 7 more than the previous number.
- 100, 90, 80, 70, 60
Yes—each number is 10 less than the previous number.
- 11, 21, 34, 15, 9
No—there is no pattern here.

English Language Arts, Grade 12 Module 1 PCG Education, 2015-11-05 Paths to College and Career Jossey Bass and PCG Education are proud to bring the Paths to College and Career English Language Arts ELA curriculum and professional development resources for grades 6-12 to educators across the country. Originally developed for EngageNY and written with a focus on the shifts in instructional practice and student experiences, the standards require Paths to College and Career includes daily lesson plans, guiding questions, recommended texts, scaffolding strategies, and other classroom resources. Paths to College and Career is a concrete and practical ELA instructional program that engages students with compelling and complex texts. At each grade level, Paths to College and Career delivers a yearlong curriculum that develops all students' ability to read closely and engage in text-based discussions, build evidence-based claims and arguments, conduct research, and write from sources, and expand their academic vocabulary. Paths to College and Career's instructional resources address the needs of all learners, including students with disabilities, English language learners, and gifted and talented students. This enhanced curriculum provides teachers with freshly designed Teacher Guides that make the curriculum more accessible and flexible, a Teacher Resource Book for each module that includes all of the materials educators need to manage instruction, and Student Journals that give students learning tools for each module and a single place to organize and document their learning. As the creators of the Paths ELA curriculum for grades 6-12, PCG Education provides a professional learning program that ensures the success of the curriculum. The program includes Nationally recognized professional development from an organization that has been immersed in the new standards since their inception. Blended learning experiences for teachers and leaders that enrich and extend the learning. A train-the-trainer program that builds capacity and provides resources and individual support for embedded leaders and coaches. Paths offers schools and districts a unique approach to ensuring college and career readiness for all students, providing state-of-the-art curriculum and state-of-the-art implementation.

Advances in instructional Psychology Robert Glaser,2019-10-25

The contributors to this volume address reasoning and problem solving as fundamental to learning and teaching and to modern literacy The research on expertise and the development of competence makes it clear that structures of knowledge and cognitive process

should be tightly linked throughout education to attain high levels of ability The longstanding pedagogical assumption that the attainment of useful knowledge proceeds from lower level learning based on the practice of fundamental skills that demand little thought to higher level competence in which problem solving finally plays an increasing role is no longer tenable It is now clear that thinking is not an outcome of basic learning but is part of the basic acquisition of knowledge and skill In learning to read for example decoding the printed word and understanding simple texts is an act of problem solving requiring inference and elaboration by the reader The prevalence of reasoning with information at all levels makes the details of its involvement a fundamental influence on learning and instruction a recurring theme in each of the chapters A rich variety of topics is addressed including an analysis of the components of teaching competence the evolution of a learner's mathematical understanding the use of causal models for generating scientific explanations the facilitation of meaningful learning through text illustrations the competence of children in argumentative interaction that results in conceptual change
