Bagga-Gupta,2018-06-11 While issues of marginalization and participation have engaged scholars across various disciplines and domains and a range of theoretical perspectives and methodological framings have been deployed in this enterprise the research presented in this volume aligns itself to alternative traditions by focusing on people s membership and participation across settings and institutional contexts The work here thus focuses on the constitution of marginalization inside outside and across a range of settings It centre stages marginalization and participation as action in the human world Going beyond a focus on the marginalized or explanations of marginalization or comparing groups of the marginalized with the non marginalized a number of contributions focus on mundane processes inside outside and across institutional settings in different geopolitical spaces Other chapters in the book demonstrate the marginalization of specific analytical foci in the research process or hegemonies of national high stake testing protocols and specific dialects in different geopolitical regions or in domains such as the sporting arena In contrast to other studies on marginalization and participation this book takes its point of departure in the complexities that characterize and shape both individuals and societies past and present Its chapters challenge demarcated fields of study and conceptions of identity framed marginalization and participation Drawing attention to the fact that the centre continues to define the margins the work presented here joins research efforts that

highlight the need to focus on the constitution of marginalization and participation in a wide range of settings with the explicit aim of going beyond static boundaries that define the human state at different scales of becoming and beyond an understanding of development and progress in terms of a linear trajectory
