Environmental Science 6e (paper) Daniel D. Chiras, 2013. [The Russian Quest for Peace and Democracy](#) Metta Spencer, 2012-07-10. In *The Russian Quest for Peace and Democracy*, Metta Spencer recounts the political and military changes that have occurred in Russia up to mid-2010. Using hundreds of interviews she conducted with officials, dissidents, and liberal intellectuals, she describes the various groups, forces, and individuals that worked to liberalize the totalitarian Soviet Union and its fellow nations behind the Iron Curtain, and which ultimately brought about the dissolution of those repressive governments. Spencer identifies four political orientations to describe Soviet society: Sheep (ordinary citizens who accepted the undemocratic regime they lived in without challenging it), Dinosaurs (hard-line Communist officials), Termites (including Mikhail Gorbachev and his advisers, and government and Barking Dogs (a few hundred dissidents who made a lot of noise protesting, hoping to awaken a grass roots demand for democracy). The strange rivalry between the Termites and Barking Dogs would ultimately doom perestroika.

Spencer's research dispels the widely held perception that US President Ronald Reagan won the Cold War by standing firm until the Soviet Union blinked first. There are vitally important lessons to be learned from the Soviet period about how to assist citizens of totalitarian and authoritarian regimes around the world. The irony is that transnational civil society organizations, major sources of the progress in Soviet Russia, are still needed today in authoritarian Russia under Vladimir Putin and Dmitry Medvedev, for totalitarianism remains a potential social trap. In *The Russian Quest for Peace and Democracy*, Metta Spencer suggests new ways of building urgently needed social capital in today's Russia where democracy has yet to flourish.

Environmental Science Daniel D. Chiras, 2006. Completely updated the seventh edition of *Environmental Science* enlightens students on the fundamental causes of the current environmental crisis and offers ideas on how we as a global community can create a sustainable future.

The Burning Answer Keith Barnham, 2014-05-15. Our civilisation stands on the brink of catastrophe. Our thirst for energy has led to threats from global warming, nuclear disaster and conflict in oil-rich countries. We are running out of options. Solar power, Keith Barnham argues, is the answer. In this eye-opening book, he shows how a solar revolution is developing based on one of Einstein's lesser-known discoveries: one that gave us laptop computers and mobile phones. An accessible guide to renewable technology and a hard-hitting critique of the arguments of solar sceptics. *The Burning Answer* outlines a future in which the fuel for electric cars will be generated on our rooftops. It is, above all, an impassioned call to arms to join the solar revolution before it's too late.
