Propagation provides an overview of the physical mechanisms that govern electromagnetic wave propagation in the Earth s  
troposphere and ionosphere Developed in conjunction with a graduate level wave propagation course at The Ohio State  
University this text offers a balance of physical and empirical models to provide basic physical insight as well as practical  
methods for system design Beginning with discussions of propagation media properties plane waves and antenna and system  
concepts successive chapters consider the most important wave propagation mechanisms for frequencies ranging from LF up  
to the millimeter wave range including Direct line of sight propagation through the atmosphere Rain attenuation The basic  
theory of reflection and refraction at material interfaces and in the Earth s atmosphere Reflection refraction and diffraction  
analysis in microwave link design for a specified terrain profile Empirical path loss models for point to point ground links  
Statistical fading models Standard techniques for prediction of ground wave propagation Ionospheric propagation with  
emphasis on the skywave mechanism at MF and HF and on ionospheric perturbations for Earth space links at VHF and
