1. Read the following passage and answer the questions A and B :

Education gives us knowledge and a set of abilities to function meaningfully in life, such as the ability to decide things rationally and make the right choices. As we learn how to read, write and do the basic operations of arithmetic, we gain a degree of self confidence. We learn to think for ourselves and articulate our thoughts; we pick up skills to communicate with others and manage our affairs well. Education helps us think independently and make our own opinions. As we know more about the world, we appreciate the good things it offers us but also become critical of the deviations from the values it imparts and the rise of hatred of conflict that follows. The first thing education does is to give us an awareness about ourselves which leads to the development of our personality. As we begin school, we feel the need to belong to the class and make friends. We then expand our sense of belonging to include the school at large, our community and finally our country. Education thus prepares every child to become an active member of the community and work for its welfare. Education, is believed, releases our potentials and our inner strengths. It sharpens our intellect and develops our creativity. As we are taught to reason well and find solutions to the problems of life, we become productive members of society. Education by definition is progressive and liberal, teaching us to respect human diversity and cultural and religious differences. If all of us practise these values in life, the world becomes a much happier place.

Education also fosters critical thinking and provides us a set of competencies including life skills that enable us to become competitive even in the most challenging of circumstances. Education also teaches us to appreciate beauty and the bounties of nature.

School, however, is not the only place where a child gets education. A Bangla poem tells us that nature can be our best teacher. Here are a couple of lines from the poem in English translation :

The sky has taught me to be liberal.

The wind has given me the motto to be industrious.

If we can make nature our friend, philosopher and guide, we can learn lessons about life that, combined with what our schools teach us, will prepare us for the future.

Poor's Corporation,1986 Anwar: Emergence of Unknown Defenders Ghazi Mokammel Hossain,2016-10-11 The entire capital became isolated from the rest of the country The Red Army tried to create anarchism in the US and the entire world It was during this chaotic moment that Anwar and his companions escaped from jail Afterwards they formed The Green Army and operated a mission called Operation Survival of USA to save the innocent civilians of the nation from this dire situation With minimal support from the US government they had to immobilize the Red Army In the meantime there was a misunderstanding between the US and other countries due this chaotic situation which could have led to World War III Could the Green Army overcome all of these obstacles and save innocent lives Most importantly could the USA survive

Healthcare Systems Jeffrey Braithwaite,Russell Mannion,Yukihiro Matsuyama,Paul G. Shekelle,Stuart Whittaker,Samir Al-Adawi,2018-05-11 In this book we invited 146 authors with expertise in health policy systems design management research or practice from each of the countries included to consider health reforms or systems improvements in their country or region The resulting case studies of 52 individual countries and five regional groupings cover 152 countries or territories or three quarters of the world s nations Each chapter author was asked to think 5 15 years into the future and make a prediction on how their health system could be strengthened as a result of the successful unfolding of their case study The types of projects our authors have chosen to explicate into the future are wide ranging They vary from e consultation services in Estonia achieving universal health coverage in Argentina and Mexico reforming long term care in the Netherlands reassessing care for the aging population and the frail elderly in Australia streamlining the health system through Lean

Thinking in Nigeria using regulation to improve care in South Africa developing a new accreditation model in Turkey through a critique of physician specialization in Russia and applying IT initiatives to improve care in China Lebanon Taiwan Papua New Guinea the United Arab Emirates Venezuela and Wales Chapter writers recognized that the improvement work they were doing was part of a moving target There was general agreement that the effective use of limited resources and overcoming hurdles and constraints were crucial to enhancing health systems in order to deliver better care over the medium term While some initiatives required considerable funding many were relatively inexpensive These case studies demonstrate ways in which fruitful application of partnerships and creativity can make considerable gains in strengthening healthcare delivery systems Features The third book in a series on international health reform Involves 146 contributing authors five regional editors a series editor and a highly skilled support team to explore sustainable improvement in health systems in the future Encompasses a time horizon of the next 5 15 years Covers 152 countries or territories with 52 individual countries and an analysis of five regional groupings comprising 100 countries

Transforming Healthcare with the Internet of Things A. Ugon,B. Séroussi,C. Lovis,2016-04-12 The current trend in health and social care systems is a shift from care provision to citizen driven health Only a few years ago the high tech devices used in healthcare were limited to health cards and personal portable devices These have since evolved dramatically to include wearables sensors and devices for measuring health values The application of such technologies has for the most part been welcomed by both patients and professionals It is the fact that these devices can be connected to and communicate with other connected devices and systems which has been the game changer in healthcare technology not least because it has empowered and will empower patients to take more control of their own healthcare management This book presents the proceedings of the Special Topic Conference STC of the European Federation for Medical Informatics EFMI held in Paris France in April 2016 The special topic this year is Transforming Healthcare with the Internet of Things The papers are divided into four sections transforming healthcare with the Internet of things societal dimensions of the Internet of things ontology and decision support and clinical information systems and data reuse with a further section for poster presentations The book will be of interest to all those involved in the provision and delivery of technology based healthcare
