

1-1 Reteach to Build Understanding

Key Features of Functions

Linear, quadratic, and absolute-value functions can be graphed using key features that the equation identifies. Key features can be labeled using either set builder notation or interval notation. Interval notation represents a set of real numbers by a pair of values. Parentheses are used when the points are not included. Brackets are used for when a boundary point is included.

1. Use the function $f(x) = x^2 - 16$ and identify the key features that are listed in the table for the graph. Label the graph with the key features.

Key Feature	
Domain	all real numbers
Range	$x > \text{ or } = -16$
Minimum Value	$(0, -16)$
x - intercept	$-4, 0, 4, 0$
y - intercept	$0, -16$
Function is Positive	$-\infty, -4, 4, \infty$
Function is Negative	$-4, 4$
Interval Increasing	∞
Interval Decreasing	$-\infty$

Domain: all real numbers

Range: $x > \text{ or equal to } -16$ 

2. Cheyenne interpreted the following function: $f(x) = x + 4$ as the first step before graphing it. She wrote her answers in the table. Find and fix her error.

Key Feature	Answer
Domain	$\{-\infty, \infty\}$
Range	$\{-\infty, \infty\}$
x - intercept	$x = 4$
y - intercept	4
Function is positive	$\{-4, \infty\}$
Function is negative	$\{-\infty, -4\}$

wrong, it would be -4

3. Identify the key features of the following graph: $f(x) = |x - 3|$

Key Feature	Clues	Answer
Domain	Values of the x -axis	all real numbers
Range	Values of the y -axis	$x > \text{ or equal to } 0$
Minimum value	Lowest point on the graph	3
x - intercept	When $y = 0$	-3
y - intercept	When $x = 0$	3
Function is positive	Function is above the x axis	$-\infty, 3, \infty$
Function is negative	Function is below the x axis	NA

Spencer, Sandra Vavra, 2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Values of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research *Advancing Learning Within and Beyond the Classroom* Bradley Lightbody, 2021-11-29 This insightful book sets out five core elements of good practice that will lead to great teaching and learning both within and beyond the classroom It looks in detail at the learning process and how teachers can support this through a rich mix of teacher led direct instruction and collaborative and online learning both flipped and blended Covering five major themes to reset our pedagogy *Advancing Learning Within and Beyond the Classroom* presents the key evidence about what works alongside practical activities to adopt or adapt to enhance your own practice The chapters cover the application of precise curricular knowledge the presentation of key questions to guide check and deepen learning elaboration to build deep understanding personalised feedback to accelerate progress the introduction of regular challenges to drive

high learning outcomes and relevant commercial and world class standards Including a comprehensive overview of evidence based practice and a wealth of practical strategies to drive engagement and productive learning this is essential reading for all teachers working in secondary schools or further education **Prentice Hall Science Explorer: Teacher's ed** ,2005
