Guides for the Journey David G. Creamer, 1996 *Guides for the Journey* is an introduction to the lives and thoughts of three significant thinkers: John Macmurray, Bernard Lonergan, and James Fowler. The book shows how their work is helpful in interpreting our lives and the world in which we live. Written for the introductory student or reader, this book makes Macmurray, Lonergan, and Fowler's work more accessible and is the first book to actually compare the thought of the three. Throughout the book, quotations from their writings help the reader to absorb and appreciate the texture and meaning of their work. Readers are not presumed to be familiar with philosophy or the meaning of technical terms used. An index and a glossary of names and key terms provide easy reference tools. Endnotes and a bibliography will stimulate further reading on the subject. *Guides for the Journey* is highly appropriate for university courses in religion as well as religious workshops and lectures.

Reading Galileo Renée Raphael, 2017-03-15 How did early modern scientists interpret Galileo's influential *Two New Sciences*? In 1638 Galileo was over seventy years old, blind, and confined to house arrest outside of Florence. With the help of friends and family, he managed to complete and smuggle to the

Netherlands a manuscript that became his final published work *Two New Sciences* Treating diverse subjects that became the foundations of mechanical engineering and physics this book is often depicted as the definitive expression of Galileo's purportedly modern scientific agenda In *Reading Galileo* René Raphael offers a new interpretation of *Two New Sciences* which argues instead that the work embodied no such coherent canonical vision Raphael alleges that it was written and originally read as the eclectic product of the types of discursive textual analysis and meandering descriptive practices Galileo professed to reject in favor of more qualitative scholarship Focusing on annotations period readers left in the margins of extant copies and on the notes and teaching materials of seventeenth century university professors whose lessons were influenced by Galileo's text Raphael explores the ways in which a range of early modern readers from ordinary natural philosophers to well known savants responded to Galileo She highlights the contrast between the practices of Galileo's actual readers who followed more traditional bookish scholarly methods and their image constructed by Galileo and later historians as modern mathematical experimenters *Two New Sciences* has not previously been the subject of such rigorous attention and analysis *Reading Galileo* considerably changes our understanding of Galileo's important work while offering a well executed case study in the reception of an early modern scientific classic This important text will be of interest to a wide range of historians of science of scholarly practices and the book and of early modern intellectual and cultural history
