Introduction to Environmental Economics Nick Hanley, Jason Shogren, Ben White, Benedict White, 2013-01-31 Part one explains the fundamental economic concepts

Eutrophication: Causes, Consequences and Control Abid A. Ansari, Sarvajeet Singh Gill, 2013-11-19 Eutrophication continues to be a major global challenge and the problem of eutrophication and availability of

freshwater for human consumption is an essential ecological issue. The global demand for water resources due to increasing population, economic developments and emerging energy development schemes has created new environmental challenges for global sustainability. Accordingly, the area of research on eutrophication has expanded considerably in recent years. Eutrophication, acidification and contamination by toxic substances are likely to pose increasing threats to freshwater resources and ecosystems. The consequences of anthropogenic induced eutrophication of freshwaters are severe: deterioration of surface waters and growing public concern as well as new interest among the scientific community. Eutrophication causes consequences control provides the latest information on many important aspects of the processes of natural and accelerated eutrophication in major aquatic ecosystems around the world. This book offers a cutting edge resource for researchers and students alike who are studying eutrophication in various ecosystems. It presents the latest trends and developments in the field including global scenarios and local threats to the dynamics of aquatic ecosystems: economics of eutrophication; eutrophication in the Great Lakes of the Chinese Pacific drainage basin; photoautotrophic productivity in eutrophic ecosystems; eutrophication's impacts on natural metal remediation in salt marshes; phytoplankton assemblages as an indicator of water quality in seven temperate estuarine lakes in southeast Australia; biogeochemical indicators of nutrient enrichments in wetlands; the microbial response as a sensitive indicator of wetland eutrophication; and ultraviolet radiation and bromide as limiting factors in eutrophication processes in semi arid climate zones. Written by respected experts and featuring helpful illustrations and photographs, *Eutrophication causes consequences control* provides a concise and practical update on the latest developments in eutrophication.

Joint Venture Strategies Zenichi Shishido, Munetaka Fukuda, Masato Umetani, 2015-12-18. Although they have the potential to create synergies, joint ventures by their nature contain inherent risk. Therefore, each partner in a joint venture needs to incentivize each other in order to maximize its own payoff. Extensive pre contractual and post contractual bargaining is essential. This book provides successful bargaining strategies from the point of view of each partner company. Using a game theoretical framework to analyze joint venture strategy, it describes practical and legal issues that arise when creating synergies and incentive bargaining in a joint venture. With a particular focus on intellectual property law, including analysis based on many real cases, the book covers issues relating to creating synergies, corporate law issues of conflicts of interest and antitrust law issues relating to cooperation between independent companies. Theoretically new and practically useful, *Joint Venture Strategies* will appeal to academics and practicing lawyers. From a corporate perspective, this book is essential for successful joint venture planning and strategy.
