Geriatric Pharmacy Review Module:

Pharmacy and the Elderly Center for Human Services (Washington, D.C.),1979 Optimizing Pharmacotherapy in Older Patients Antonio Cherubini,Arduino A. Mangoni,Denis O'Mahony,Mirko Petrovic,2023-06-21 This book summarizes the broad and rapidly evolving field of geriatric pharmacotherapy which is becoming increasingly relevant for practicing physicians who care and prescribe medications for older patients Around the globe ageing populations are associated with an increased prevalence of chronic diseases Older adults are often affected by multimorbidity i e suffer from more than one chronic disease The main consequence of multimorbidity is polypharmacy which is commonly defined as the regular use of five or more medicines Polypharmacy has now reached epidemic proportions in our societies and is associated with an increased risk of drug drug interactions drug disease interactions and adverse drug reactions The management of polypharmacy in older patients with complex multimorbidity poses several challenges and needs to be based on specific knowledge and prescribing expertise The aim of this book is to provide a comprehensive update on the field and to share the expertise needed to optimize the management of pharmacotherapy in older patients **Evidence-Based Geriatric**

Nursing Protocols for Best Practice Marie Boltz,Marie P. Boltz,Elizabeth Capezuti,Terry T. Fulmer,2024-09-26 Praise for previous editions The evidence based protocols are designed as a primary reference and are useful substantive and timely The broader contributions of useful format and succinct review of the evidence make it likely that this text will continue to be the leading resource in nursing education and practice The Gerontologist As a gerontological clinical educator research nurse I will often use this as a reference The format and the content are good and the explanations of how to best use the evidence simplify the process of sifting through mountains of information to figure the best practice Score 97 Doodys The result of a collaboration between expert practitioners and educators in geriatric nursing the seventh edition of this acclaimed reference has been updated and revised with new information on chronic conditions and emerging models of care presented in 10 completely new chapters It provides the most current evidence based protocols for improving both quality of care and patient outcomes when caring for older adults in multiple disciplines and settings As in past editions the seventh edition is distinguished by its use of a rigorous systematic method AGREE Appraisal of Guidelines for Research and Evaluation to improve the validity of the book s evidence based content Chapters provide assessment and management principles clinical interventions and information on specialty practice and models of care Included in most chapters are protocols developed for each clinical condition by experts in that specific area Evidence is current and derived from all settings of care including community primary acute and long term care Protocols include an overview and evidence based assessment and intervention strategies Illustrative case studies with discussion are presented in most chapters along with chapter objectives and references with evidence ratings Instructor s resources include an AACN Mapping Grid Course Cartridge Transition Guide PowerPoints and Test Bank New to the Seventh Edition Updated to encompass the latest trends in older adult care chronic

conditions and emerging models of care New chapters on care and management of diabetes and respiratory care New chapters on issues surrounding nutrition and dementia and mental illness New chapter on care and comfort at the end of life New chapters on adopting principles of diversity equity and inclusion and an age friendly health system into practice New chapters on models of care in long term community based and primary care Key Features Delivers easy to follow geriatric protocols for best practices Updates evidence regularly to reflect current practice standards Encompasses a broad scope of content including detailed information rarely covered in professional literature Offers case studies and discussions to illustrate application of protocol to practice Written by renowned leaders in geriatric nursing education and practice Use of AGREE Appraisal of Guidelines for Research and Evaluation to improve the validity of evidence throughout the text

Geriatric Medicine Michael R. Wasserman,Debra Bakerjian,Sunny Linnebur,Sharon Brangman,Matteo Cesari,Sonja Rosen,2024-02-19 Both volumes sold as a combined set for a one time purchase Older adults represent the most rapidly growing demographic in the U S and in many developed countries around the world The field of geriatric medicine is still relatively young and is only recently seeing a significant increase in peer reviewed literature Medicare and Medicaid expenditures related to older adults are nearly a trillion dollars year in the US How our healthcare system cares for older adults and how those older adults navigate an increasingly complex system is of the utmost importance According to the Institute of Medicine physicians and other healthcare professionals receive an inadequate amount of training in geriatric medicine Geriatric medicine is based on the concept of delivering person centered care with a focus on function and quality of life It is essential that physicians nurse practitioners physician assistants pharmacists social workers and other health care professionals all be knowledgeable about thegeriatric approach to care Geriatric medicine varies from most other fields in medicine While many specialties function on the basis of evidence based literature geriatricians and other clinicians caring for older adults must integrate relatively limited evidence with variable physiological changes and complex psychosocial

determinants Geriatricians are used to caring for 90 year olds with multiple chronic illnesses Their variable physiology leads to uncertain responses to pharmacotherapy and their personal goals and wishes need to be incorporated into any plan of care Practicing geriatric medicine requires the ability to see patterns But it goes one step further as the rules are constantly in flux Every patient is an individual with particular needs and goals In order to provide true person centered care to older adults one has to incorporate these factors into the decision making process The proposed handbook is designed to present a comprehensive and state of the art update that incorporates existing literature with clinical experience Basic science and the physiology of aging create a background but are not the main focus This is because every chapter has been written through the lens of person centered care This book is about focusing on what matters to the person and how that is not always about pathology and physiology The reader generally will not find simple solutions to symptoms diseases and syndromes In fact the key to caring for geriatric patients is the ability to think both critically and divergently at the same time Geriatrics encompasses multiple disciplines and spans all of the subspecialties It requires knowledge of working within an interdisciplinary team It requires an appreciation of how quality of life varies with each individual and creates treatment and care plans that also vary And most of all it requires a firm commitment to first learning who the person is so that all of the necessary data can be analyzed and integrated into a true person centered plan of care This book aims to serve as an unparalleled resource for meeting these challenges Updated and revised from the previous edition this text features over 40 new peer reviewed chapters new references and a wide array of useful new tools that are updated on a regular basis by interdisciplinary and interprofessional experts in geriatric medicine
