Society relies heavily on credit for most financial decisions Today good credit is not just important for getting a loan or a credit card Many businesses have to check your credit before deciding whether or not they will extend their products and services to you Mortgage lenders need to be sure that you will pay your mortgage responsibly before they can finance you Without good credit the mortgage lender concludes that giving you a loan is risky for them If they still approve regardless of your poor credit they will charge you a very high interest rate Bad credit will see you pay a higher mortgage amount or worse your mortgage application will be declined Just because you are not currently interested in buying a house does not mean that your credit does not matter Landlords will in most cases consult your credit before renting you a house or apartment Your lease is considered a loan You require a loan to purchase a car unless you have the full amount at hand Your credit score affects the loan amount and interest rate and whether or not you will be given the loan in the first place With excellent credit you will qualify for a higher loan amount and the interest rate will be lower A poor credit score translates to limited options Not many lenders will be ready to finance you and the few that will be willing might charge a very high interest rate
