Student 1 completed the following oral-rhythmical movements including sounds, biting tongue depressor, blowing a kiss, and smiling. He was observed successfully drinking juice from a sippy cup.

LANGUAGE SAMPLE

During conversation Student 1's articulation, voice, fluency, and language skills were informally evaluated. Due to his limited to no verbal output with the examiner, an adequate language sample was not collected.

LANGUAGE

Student 1's language skills were formally evaluated using the Receptive-Expressive Emergent Language Test–Fourth Edition (REEL-4) on April 12, 2022. The following scores were obtained using an interview format with Mr. J:

	Raw Score	Standard Score	90% Confidence Interval	Percentile Rank
Receptive Language			to	
Expressive Language			to	
Language Ability		81	to	10

Descriptive Terms for REEL-4 Subtest and Composite Standard Scores:

REEL-4 Score	Descriptive Term
>130	Very Superior
121–130	Superior
111–120	Above Average
90–110	Average
80–89	Below Average
70–79	Borderline Impaired or Delayed
<70	Impaired or Delayed

The REEL-4 is an individually administered rating scale of emergent language ability designed to be completed by caregivers of children age birth through 36 months. It has two core subtests, one core composite, two supplemental subtests, and one supplemental composite.

Subtests

The Receptive Language subtest measures the child's current responses to sounds or language as reported by a parent or caregiver. It consists of 74 items that are answered by yes/no responses. When administered using an interview format, the examiner circles Y or N, with the total number of yes responses yielding the raw score. When the subtest is completed as a checklist by a caregiver, the informant circles Y or N and the examiner applies the scoring rule to obtain the raw score. The resulting standard score is reported as the Receptive Language Score.

Student 1 received a receptive language raw score of 52 (standard score = 87, confidence interval = 81 to 93, percentile rank = 19). This score is in the **below average range** of developmental functioning. Mr. J reports Student 1 demonstrates the following behaviors most of the time or always:

- Understands adults who use normal adult language rather than baby talk.
- Recognizes the meanings of more and more new words each day.
- Performs actions such as jump, throw without needing extra cues or gestures.
- Follows requests such as "Give it to her" or "Show it to them" in a situation where not everyone's name is known.
