Plant Functional Diversity Eric Garnier, Marie-Laure Navas, Karl Grigulis, 2016 Biological diversity the variety of living organisms on Earth is traditionally viewed as the diversity of taxa and species in particular However other facets of diversity also need to be considered for a comprehensive understanding of evolutionary and ecological processes This novel book demonstrates the advantages of adopting a functional approach to diversity in order to improve our understanding of the functioning of ecological systems and their components The focus is on plants which are major components of these systems and for which the functional approach has led to major scientific advances over the last 20 years Plant Functional Diversity presents the rationale for a trait based approach to functional diversity in the context of comparative plant ecology and agroecology It demonstrates how this approach can be used to address a number of highly debated questions in plant ecology pertaining to plant responses to their environment controls on plant community structure ecosystem properties and the services these deliver to human societies This research level text will be of particular relevance and use to graduate students and professional researchers in plant ecology agricultural sciences and conservation biology

From Photon to Neuron Philip Nelson, 2017-05-09 A richly illustrated undergraduate textbook on the physics and biology of light Students in the physical and life sciences and in engineering need to know about the physics and biology of light Recently it has become increasingly clear that an understanding of the quantum nature of light is essential both for the latest imaging technologies and to advance our knowledge of fundamental life processes such as photosynthesis and human vision From Photon to Neuron provides

undergraduates with an accessible introduction to the physics of light and offers a unified view of a broad range of optical and biological phenomena Along the way this richly illustrated textbook builds the necessary background in neuroscience photochemistry and other disciplines with applications to optogenetics superresolution microscopy the single photon response of individual photoreceptor cells and more With its integrated approach From Photon to Neuron can be used as the basis for interdisciplinary courses in physics biophysics sensory neuroscience biophotonics bioengineering or nanotechnology The goal is always for students to gain the fluency needed to derive every result for themselves so the book includes a wealth of exercises including many that guide students to create computer based solutions Supplementary online materials include real experimental data to use with the exercises Assumes familiarity with first year undergraduate physics and the corresponding math Overlaps the goals of the MCAT which now includes data based and statistical reasoning Advanced chapters and sections also make the book suitable for graduate courses An Instructor s Guide and illustration package is available to professors

Wearable Sensor Technology for Monitoring Training Load and Health in the Athletic Population Billy Sperlich,Hans-Christer Holmberg,Kamiar Aminian,2020-02-13 Several internal and external factors have been identified to estimate and control the psycho biological stress of training in order to optimize training responses and to avoid fatigue overtraining and other undesirable health effects of an athlete An increasing number of lightweight sensor based wearable technologies wearables have entered the sports technology market Non invasive sensor based wearable technologies could transmit physical physiological and biological data to computing platform and may provide through human machine interaction smart watch smartphone tablet bio feedback of various parameters for training load management and health However in theory several wearable technologies may assist to control training load but the assessment of accuracy reliability validity usability and practical relevance of new upcoming technologies for the management of training load is paramount for optimal adaptation and health
