

My personal journey in education. Connecting my story to educational theory. Growing as a student I started school at the age of five, and I had no interest in sitting down and listening to anyone. I loved learning to read, but I really just wanted to outside playing and running around. The teachers always sat me up front because I would distract the other students. It was not that I was a bad kid, I just didn't fit into the model very well. Don't get me wrong, I had wonderful teachers who taught me great foundations, it was just the sitting still all day that bothered me, and I still think of that sensation now when I morph into a boring talking head in front of one of my classes. I did not like school very much, and I thought that meant I did not like learning. Boy, was I wrong. Then when I was 10 years old I became a Constructivist, I didn't know it at the time, but I was exploring a way of learning that I would not know the definition of until I was well into the 21st Century. How I became as Constructivist is a long drawn out story of self-discovery, but really it is all about: Drums! When I was ten, I started to play the drums. I spent most of my time in front of a tape or record player; I upgraded (downgraded?) to CD around 1993. I was constructing my own learning in a way which made sense to me. I didn't know it at the time, but I developed relative pitch during this period because not only did I learn drums by listening to music and copying what I heard, I also transferred this love of learning to guitar, and later on to bass. It was this love of finding a hobby which helped me make it through junior and senior high. I was able to join school bands and it gave me a purpose and inspired me to go to class every day. In fact, I went from almost failing my junior high years to receiving scholarships at the end of my grad 12 year. I intended to keep learning as much as possible about music. In university, I was in a strict traditional lecture based classical music program, but I was spending my weekends playing various styles of rock music. I was reading music in the daytime, and "lifting" charts from the internet and from CDs in the nighttime. I was finding online communities which

Native Americans in Comic Books Michael A. Sheyahshe, 2014-11-29 This work takes an in depth look at the world of comic books through the eyes of a Native American reader and offers frank commentary on the medium's cultural representation of the Native American people. It addresses a range of portrayals from the bloodthirsty barbarians and noble savages of dime novels to formulaic secondary characters and sidekicks and occasionally protagonists sans paternal white hero examining how and why Native Americans have been consistently marginalized and misrepresented in comics. Chapters cover early representations of Native Americans in popular culture and newspaper comic strips, the Fenimore Cooper legacy, the white Indian, the shaman, revisionist portrayals, and Native American comics from small publishers among other topics.

Resistance to Multiculturalism Jeffery Scott Mio, Gene I. Awakuni, 2013-11-12 Heightened interest in multicultural issues in psychology and an understanding of culture as a critical aspect of human behavior has moved the topic of multiculturalism into the forefront of research and to required coursework in the helping professions. However, this is not without the backlash of resistance. *Resistance to Multiculturalism: Issues and Interventions* examines the subtle forms of racism and resistance to the multicultural movement in psychology and society. The authors use their vast experience in the arena of multiculturalism, both from the perspective of teaching and administration, to detail accounts, experiences, and challenges of resistance. Therapy and research is interwoven throughout this text that begins by placing multiculturalism at the heart of the best traditions of scholarship as proposed by the highly regarded Ernest Boyer of The Carnegie Foundation for the Advancement of Teaching. In a conversational style and through chapters addressing what includes modern resistance, the classroom stereotypes, resistance at the administrative level, and groups, this book offers techniques and interventions to overcoming resistance. Readers who teach multiculturalism, students, researchers, and those advocating for multiculturalism on the broader community level will find *Resistance to Multiculturalism* an informative guide to combating the challenges of resistance. A

Chinese Perspective on Teaching and Learning Betty C. Eng, 2012-01-25 Bringing together educators from a range of backgrounds, psychology, sociology, social work, counseling, and teaching, this volume shows how Asian cultural values and beliefs can provide a lens through which to understand and envision how curriculum and pedagogy can be creatively adapted, not only in a local Chinese classroom context but in a global context as well.
