Expanded to reflect the universal core elements of critical care nursing practice, authors Aitken, Marshall and Chaboyer have retained the specific information that captures the unique elements of contemporary critical care nursing in Australia, New Zealand and other similar practice environments. Structured in three sections, ACCCN's Critical Care Nursing 3e addresses all aspects of critical care nursing including patient care and organisational issues while highlighting some of the unique and complex aspects of specialty critical care nursing practice such as paediatric considerations, trauma management and organ donation. Presented in three sections: Scope of Critical Care, Principles and Practice of Critical Care, Specialty Practice. Focus on concepts that underpin practice: essential, physical, psychological, social and cultural care. New case studies elaborate on relevant care issues. Practice tips highlight areas of care particularly relevant to daily clinical practice. Learning activities support knowledge, reflective learning and understanding. Additional case studies with answers available on Evolve. NEW chapter on Postanaesthesia recovery. Revised coverage of metabolic and nutritional considerations for the critically ill patient.
