The Librarian's Introduction to Programming Languages Beth Thomsett-Scott, 2016-06-21 The Librarian's Introduction to Programming Languages presents case studies and practical applications for using the top programming languages in library and information settings While there are books and Web sites devoted to teaching programming there are few works that address multiple programming languages or address the specific reasons why programming is a critical area of learning for library and information science professionals There are many books on programming languages but no recent items directly written for librarians that span a variety of programs Many practicing librarians see programming as something for IT people or beyond their capabilities This book will help these librarians to feel comfortable discussion programming with others by providing an understanding of when the language might be useful what is needed to make it work and relevant tools to extend its application Additionally the inclusion of practical examples lets readers try a small app for the language This also will assist readers who want to learn a language but are unsure of which language would be the best fit for them in terms of learning curve and application Languages covered are JavaScript PERL PHP SQL Python Ruby CC Java This book is designed to provide a basic working knowledge of each language presented case studies which show the programming language used in real ways and resources for exploring each language in more detail

How to Make a Database in Historical Studies

Tiago Luís Gil, 2021-07-27 This book is a greatly supplemented translation from Portuguese originally published in 2015 It discusses the most appropriate ways to create databases for research on history and other humanities including an extensive debate about the usages that historians have made of computing since the 1950s It has four chapters the first is dedicated to theoretical and methodical questions about the usage of databases in history the second is about technical issues the third presents the concept of research engineering how to improve research in groups the last is about the construction of databases The author states that the use of technology in research in history and humanities should be preceded and mediated by theories and methods which deal with these disciplines and not by technical issues The historian must know how to think correctly in order to use the technological tools in an autonomous way The book provides a background demonstrating how theory methodology and technique are always articulated in historical research and will appeal to history students and researchers
