Jewelry & Gems - The Buying Guide, 7th Edition, 2009 **Modern Jeweler's Consumer Guide to Colored Gemstones** David Federman, 2012-12-06 Since early 1989 a gem dealer I ve known for years has been calling me every few weeks to brief me on mounting mayhem in Colombia s lucrative emerald market The troubling gist of these calls is always this There is a full fledged turf war going on between that South American country s bustling drug and gem trades for control of its emerald ex port business According to this dealer and several others anywhere from two to four thousand emerald industry people mostly miners and deal ers have been murdered since 1980 No doubt the gem sector itself never gun shy has retaliated in full and in kind After all the two groups have banded together in an intermittent alliance against a common enemy Communist guerillas with results the CIA would envy I mention this bloodshed because of something the gem dealer once said to me I bet you never think of what a gem has to go through to get to a jewelry store He s right I tend to think of colored stones as things of beauty not objects of gruesome power struggles between mining kingpins and drug lords Can you blame me or anyone with insider knowledge if a gem sheds any connection with its past once sculpted by a cutter into the glittering mar vel we see in a jeweler s showcase Like Odysseus listening to the sirens song we become victims of an aesthetics induced amnesia

Riitahuhta,2013-04-17 One of the foundations for change in our society comes from designing Its genesis is the notion that the world around us either is unsuited to our needs or can be improved The need for designing is driven by a society's view that it can improve or add value to human existence well beyond simple subsistence As a consequence of designing the world which we inhabit is increasingly a designed rather than a naturally occurring one In that sense it is an artificial world Designing is a fundamental precursor to manufacturing fabrication construction or implementation Design research aims to develop an understanding of designing and to produce models of designing that can be used to aid designing Artificial intelligence has provided an environmental paradigm within which design research based on computational constructions can be carried out Design research can be carried out in variety of ways It can be viewed as largely an empirical endeavour in which experiments are designed and executed in order to test some hypothesis about some design phenomenon or design behaviour This is the approach adopted in cognitive science It often manifests itself through the use of protocol studies of designers The results of such research form the basis of a computational model A second view is that design research can be carried out by positing axioms and then deriving consequences from them **Gems & Gemology** ,2003 *The Ruby & Sapphire Buying Guide* ,1994 You don't have to be a jeweler or gemologist to tell a ruby from red glass or a good sapphire from a bad one The Ruby and Sapphire Buying Guide will show you how It's easy to read has lots of photos and gives clear step by step pointers on how to buy the best stone for the money This is the only book to offer detailed guidelines and pictures on judging ruby and sapphire quality Book jacket
