Techniques for management and measurement as well as case studies from around the world are provided. The second edition includes a complete update of the text with increased coverage of major topics including the Anthropocene, complexity, resilience, environmental ethics, governance, the IPCC's latest findings on climate change, Sustainable Development Goals, and new thinking on native species and novel ecosystems. Chapters include further reading and discussion questions. The book is supported by a companion website with links, detailed reading lists, glossary, and additional case studies together with projects, research problems, and group activities, all of which focus on real-world problem solving of sustainability issues. The textbook is designed to be used by undergraduate college and university students in sustainability degree programs and other programs in which sustainability is taught.
