Williams,2012 Presents practical instrucion and theory for using the features of HTML5 to create a online gaming applications Frontend Workflow with HTML5 and SASS Alin Seba,2015-03-03 It is not that hard to explain why I ve decided to write this book The main reason is very simple I want people to start learning writing clean clear and smart code On the other hand in complement to the main reason I also wanted to make developers aware of what they can achieve if they will think out of the box and not following rigorously some current working habits which tend to standardize everything around This book started

from a very strong desire of mine after seeing everywhere a lot of bad use of HTML and CSS I say bad because I do not claim what I will expose in this book is the shiniest and coolest thing around The approach I take is somehow opinionated but it served me very well during the last two years so I m really into sharing this knowledge with you And after all the rules that you are imposing on everything you do take you to an opinionated state of mind anyway just like discipline is something that you attain after a lot of dedicated time perseverance and hard work The book is for those of you who are sick and tired of working on a project that is taking a lot of time because you either start with no code base at all you change very often new libraries and frameworks on the promise they will solve all your problems or you simply find it difficult to wire up and organise your code in a smart and lucrative way so you can focus on the project itself instead of worrying about your tools You will learn the following things write clean code you will learn how to write clear semantic and concise code that will make sense to you and your co workers better organisation of your projects having things sorted out in a visible manner will bring you big benefits when you re searching for something and know where to find it or when you want to move things around without breaking anything else creating modularized and reusable components learn to create reusable components modify and extend them easily code faster and smarter improve your workflow the time you spend on projects is very important so if you will develop on a good code base your coding speed will fasten up but not only this you will write code in a very semantic and understandable way not only to you but to others too get a grasp of web components every day the web technologies are immersing and it seems the future of web developing will be centered around web components so basically a web component will serve you everything you need from it it will act as a sole unit that communicates with other components tailor your own web framework creating your own framework that suits your needs and can be used in the best possible way to get things done take it to a minimum you will also learn how to grab out only the things you need on a particular project and not overwhelming your code base with unnecessary stuff this way you will make your clients Internet bandwidth happy and speed up response times

Head First HTML5 Programming Eric Freeman,Elisabeth Robson,2011-10-06 HTML has been on a wild ride Sure HTML started as a mere markup language but more recently HTML s put on some major muscle Now we ve got a language tuned for building web applications with Web storage 2D drawing offline support sockets and threads and more And to speak this language you ve got to go beyond HTML5 markup and into the world of the DOM events and JavaScript APIs Now you probably already know all about HTML markup otherwise known as structure and you know all about CSS style presentation but what you ve

been missing is JavaScript behavior. If all you know about are structure and presentation you can create some great looking pages but they're still just pages. When you add behavior with JavaScript you can create an interactive experience even better you can create full blown web applications. Head First HTML5 Programming is your ultimate tour guide to creating web applications with HTML5 and JavaScript and we give you everything you need to know to build them including how to add interactivity to your pages how to communicate with the world of Web services and how to use the great new APIs being developed for HTML5. Here are just some of the things you'll learn in Head First HTML5 Programming. Learn how to make your pages truly interactive by using the power of the DOM. Finally understand how JavaScript works and take yourself from novice to well informed in just a few chapters. Learn how JavaScript APIs fit into the HTML5 ecosystem and how to use any API in your web pages. Use the Geolocation API to know where your users are. Bring out your inner artist with Canvas HTML5's new 2D drawing surface. Go beyond just plugging a video into your pages and create custom video experiences. Learn the secret to grabbing five megabytes of storage in every user's browser. Improve your page's responsiveness and performance with Web workers. And much more.

HTML5 Advertising John Percival, 2013-02-03

Web advertising is changing. What was once a predominantly Flash based medium is making the switch to HTML5 with the benefit of a plug in free environment giving a larger audience for ads and better integration with the page they are featured on. We live in a time where marketers, designers and developers are confused as to what they can and can't do on different devices, browsers and operating systems. What better way to finally make sense of it all than by stepping through the entire campaign process on your own terms. HTML5 Advertising will educate you on the whole digital advertising process from start to finish and help you take advantage of new HTML5 features such as canvas, CSS3, animations, DOM events, audio and video and offline storage. You'll also learn how to get around discrepancies in browser support with JavaScript and polyfills. You will be provided with tips and tricks to better optimize content across screens and make the most successful campaign with the lightest footprint possible which is especially important when deploying to mobile devices. This book takes you through the advertising campaign process with HTML5 from design to delivery. Provides in depth knowledge into the digital advertising landscape and the HTML5 specification. Communicates tips and tricks coming from Flash and ActionScript to HTML5, CSS3 and JavaScript. HTML5 Advertising equips you with the knowledge to attack cutting edge rich media projects with confidence and scale while also learning the essentials to communicate to internal and external clients. HTML5 is here whether you like it or not so why not jump in early and head down the path of building the future.
