The Results Fieldbook Michael J. Schmoker, 2001 What is the single most important event of the school year that affects school improvement How do you measure school improvement How can simple tools already at your fingertips work more effectively to improve student achievement in reading math and more The Results Fieldbook answers these questions and describes in abundant practical detail how five school systems overcame obstacles and achieved exceptional results for all their students These schools focused on the proven core concepts that Mike Schmoker described in both editions of his first ASCD book Results The Key to Continuous School Improvement Supplementing the five case studies brief vignettes written by practitioners show how core practices teamwork the use of achievement data and planning for measurable goals made an immediate and profound difference in student learning at their respective schools A close look at these school systems reveals the simplicity of school improvement efforts built around the still overlooked and most potent force in improvement collective organized teacher intelligence This book contains easily adapted processes and refinements that result from such teacher collaboration and all but guarantee measurable improvement Tables figures and appendixes illustrate effective data collection processes and at the conclusion a three part synthesis of the best of these systems provides practical steps toward implementing this radically more effective approach to school improvement starting with preservice education

The Results Fieldbook Mike Schmoker, 2001-09-15 Looks at educational practices that can make an immediate and profound difference in student learning

Answers to Science Questions from the Stop Faking It! Guy William C. Robertson, 2009 This valuable and entertaining compendium of Bill Robertson's popular Science 101 columns from NSTA member journal Science and Children proves you don't have to be a science geek to understand basic scientific concepts The author of the best selling Stop Faking It series explains everything from quarks to photosynthesis telescopes to the expanding universe and atomic clocks to curveballs all with his trademark wit and irreverence The 33 short columns plus a new introduction provide an introductory science course of sorts covering topics in life science Earth and space science physical science technology and more perfect for K-8 teachers homeschoolers or parents who just want to boost their science know how Easily understood prose and lively illustrations by cartoonist Brian Diskin make this volume an engaging and more important readable course you can pass with flying colours
