Language of Palestine and Adjacent Regions John Courtenay James, 1920 Rendering the Regional Edward M.

Gunn, 2006-01-01 For centuries the sub national languages of China have been a fundamental feature in daily life and popular culture while a standardized form of Mandarin has been adopted as the language of the state including education Suppressed during powerful movements to establish a modern national culture these local languages or dialects have nevertheless survived and their resurgence in the media and literature has caused tensions to surface Concerns for education law and commerce have all promoted a standard national language yet at the same time as local societies have undergone massive transformations the need to re imagine communities has repeatedly challenged the adequacy of a single language to represent them Moreover local languages have been presented in dramatically different and conflicted roles as symbols of the failure to assimilate to a cultural mainstream which in turn may be parodied as contingent and inadequate or asserting the identity of a community as a site of its own cultural production and not merely as a venue for transmitting a national culture Acknowledging local language as authentic may also reveal cultural hegemonies within regions and contested versions of communities This ground breaking study surveys in detail the sweep of local languages in television radio film and print culture of late twentieth century mainland China especially Beijing Shanghai Chongqing and Chengdu Hong Kong and Taiwan Focusing on these regions the analysis contrasts and compares these distinct communities to each other and to the ways in which they mediate culture as a national institution It draws on a wide range of critical cultural and media studies and explores how varied genres Assimilation Vijaya B.. Language Mapping Jürgen Erich Schmidt,2011-03-30 The

Handbook of Language Mapping aims to explore the core methodological and theoretical approaches of linguistic cartography. In both empirical and theoretical linguistics the spatial variation of language is of increasing interest and the visualization of language in space is therefore also of growing significance. It is the precondition for correct data interpretation. But how does it work? What has to be considered when drawing a map? And how has the problem been tackled so far? This book provides answers to such questions by taking a closer look at the theoretical issues surrounding cartography and at the concrete practice of mapping. The fundamental issues raised are addressed particularly well since linguistic geography is not only one of the domains with a lengthy tradition; it is also one of the most progressive fields in linguistics. At the same time because of their visual primacy linguistic maps directly confront the challenges of human perception and aesthetics. In this context envisioning the fruits of language mapping is a fascinating and inspiring endeavor not just for experts. With its accessible texts and wealth of full color images the handbook not only represents a comprehensive manual serving the interests of a variety of readers; it also fills a gap in the ongoing linguistic discourse.

Heritage and School Language Literacy Development in Migrant Children Raphael Berthele, Amelia Lambelet, 2017-11-15

This book discusses literacy development in heritage language speakers and presents the results of four different quantitative studies that investigate the transfer of literacy skills in bi and multilingual language development. The empirical studies focus on different populations of pupils, most of them located in various parts of Switzerland and emphasise the potential residing in shared or transferred resources between their heritage languages and the languages spoken in the region to which their family has immigrated. The goal of all studies was to gain an understanding of the factors both linguistic and non linguistic in nature that contribute to the development of language skills in both the heritage and school languages. Theoretical assumptions are put to the test via hypothesis testing and the generally shared assumptions on bilingual education are questioned based on the data. Furthermore methodological problems in the investigation of linguistic interdependence are discussed. This book contributes to the scholarly investigation of potential beneficial effects in academic proficiency across languages in migrant children.
