Private Security and Identity Politics Jutta Joachim, Andrea Schneiker, 2018-07-18 This book examines the self representation and identity politics of Private Military and Security Companies PMSCs PMSCs have become increasingly important over the past few decades While their boom is frequently explained in functional terms such as their cost efficiency and effectiveness this book offers an alternative explanation based on an analysis of the online self presentations of forty two US and UK based companies PMSCs are shaping how they are perceived and establishing themselves as acceptable and legitimate security actors by eclectically appropriating identities more commonly associated with the military businesses and humanitarian actors Depending on their audience and clients needs they can be professional hero warriors or promise turn key security solutions based on their exceptional expertise or in a similar way to humanitarians reassure those in need of relief and try to make the world a better place Rather than being merely public relations the self referential assertions of PMSCs are political Not only do they contribute to a normalization of private security and reinforce an already ongoing blurring of lines between

the public and private sectors they also change what we deem to be security and a security actor This book will be of much interest to students of private military companies critical security studies military studies security studies and IR
