Transformational Leadership and the Modern Presidency Andrzej Demczuk, 2023-06-15 This book seeks to analyze the leadership of three presidents Bill Clinton George W Bush and Barack Obama as well as to examine the impact of the presidents leadership had on the leadership of the advisers they worked with during their presidencies Transformational leadership a term first introduced by James MacGregor Burns describes a process in which leaders and followers help each other to advance to a higher level of morale and motivation In order to measure transformational leadership Bernard M Bass's model which includes four elements an idealized influence inspiring motivation intellectual stimulation and individual treatment is applied throughout It is crucial to

conduct an analysis of the relationships between the examined three presidents and their advisers in order to demonstrate if the subordinates excelled in leadership because of the presidents leadership skill **PSBA Bulletin** ,1978 *Building Engaged Schools* Gary Gordon,2006-09-07 Facing greater challenges from increased expectations and global competition America s public schools can pass the test by thinking and acting differently about selecting teachers and principals nurturing the talents of students and teachers and the importance of community involvement Can America s public schools long resistant to change meet the challenges of globalization and new educational alternatives Not by doing what they re doing today So argues *Building Engaged Schools* a book that challenges the faulty assumptions that guide American public education In our efforts to create the best possible schools for America s kids we ve allowed process concerns such as standards curriculum and testing to overshadow the importance of people But the fact is what we ve come to think of as the soft aspects of education are actually what make truly effective learning possible Building relationships nurturing student and teacher talents fostering engagement these are what motivate great teachers and inspire students Indeed if schools can learn anything from the business world it s this The soft stuff drives results Corporate leaders have realized that the best way to improve productivity is to tap the talents and motivation of their human assets This approach is even more critical in the classroom An overemphasis on process reforms has set the education system at odds with both teachers and students Too many students are lethargic or alienated too many teachers have become disillusioned and cynical We must find a way to bring public schools back to life and to tap the enormous potential that exists in America s classrooms Drawing on decades of Gallup research *Building Engaged Schools* offers a fresh approach Leverage student and teacher talent on a school by school basis Focusing on talent may lack the political appeal of process reforms which can be implemented in broad strokes This approach is surely more complex But the return on the time and effort invested is far greater In fact that return is no less than a more fully engaged society and a better future for America s children [Resources in Education](#) ,1993-07
