Hesi Pathophysiology Study Guide:

Innovative Teaching Strategies in Nursing and Related Health Professions Martha J. Bradshaw, Beth L. Hultquist, Debra Hagler, 2019-09-27 Teaching Strategies in Nursing and Related Health Professions Eighth Edition details the trends in teaching strategies and educational technology that promote effective learning for today's students. The Eighth Edition has been updated to provide the most current information and strategies for online learning and incorporating technology across settings. Chapters on blended learning and study abroad programs help students to gain a more diverse and increased global perspective. Highlighting innovative teaching techniques and real world illustrations of the educational strategies, this text goes beyond theory to offer practical application principles that educators can count on. **Reducing Animal Use in Carcinogenicity Testing** Joseph Manuppello, Jan Willem Van Der Laan, Federica Madia, 2024-12-31 Carcinogenicity to rats and mice is evaluated for substances to which humans are exposed including pharmaceuticals, agrochemicals, and industrial chemicals. For pharmaceuticals, recent efforts to reduce animal use in long term studies include an addendum to the International Council for Harmonisation (ICH) guideline S1B R1 that prioritizes short term studies in transgenic mice and recommends assessing the weight of evidence available to first determine whether a long term study in rats would add value. For other sectors, an expert group of the Organisation for Economic Cooperation and Development (OECD) is developing an Integrated Approach to the Testing and Assessment (IATA) of non genotoxic carcinogens based on common hallmarks of cancers and on key characteristics of carcinogens. Within current regulations, animal use could be reduced by evaluating toxicokinetics in main study animals with microsampling methods by including only one negative control group and by genotyping transgenic mice instead of using positive control groups in each study.
