Golub,2010-05-07 From the American Revolution and the signing of the Declaration of Independence to the waning popularity of the Iraq war Philip Golub depicts the long American journey to global ascendancy Through the study of imperial identity formation Golub shows how a culture of force and expansion has shaped American foreign policy Taking a historical and sociological approach to his examination of the US logic of world power he reveals how entrenched assumptions about America s primacy inhibits democratic transformation at domestic and international levels forging a new world where America is no longer able to set the global agenda

Dynamic Governance: Embedding Culture, Capabilities And Change In Singapore (English Version) Boon Siong Neo,Geraldine Chen,2007-07-03 In a world of uncertainty and change current achievements are no guarantee for future survival Even if the initial chosen set of principles policies and practices are good static efficiency and governance would eventually lead to stagnation and decay No amount of careful planning can assure a government of continual relevance and effectiveness if there is no capacity for learning innovation and change in the face of ever new challenges in a volatile and unpredictable global environment This book provides an in depth look at dynamic governance the key to success in a world of rapid increasing globalization and unrelenting technological advancements If bureaucratic public institutions can evolve and embed the culture and capabilities that enable continuous learning and change their contributions to a country s socio economic progress and prosperity would be enormous The lessons from their efforts in institutionalizing culture capabilities and change could provide meaningful and valuable insights for transforming organizations in other contexts

Routledge Handbook of Global Public Health in Asia Siân M. Griffiths,Jin Ling Tang,Eng Kiong Yeoh,2014-04-16 Global public health is of growing concern to most governments and populations nowhere more so than in Asia the world s largest and most populous continent Whilst major advances have been made in controlling infectious diseases through public health measures as well as clinical medical treatments the world now faces other challenges including ageing populations and the epidemic crisis of obesity and non communicable diseases New emerging infections continue to develop and the growing threats to health due to environmental pollution and climate change increase the need for resilience and sustainability These threats to health are global in nature and this Handbook will explore perspectives on current public health issues in South Southeast and East Asia informing global as well as regional debate Whilst many books cite Western examples of the development of global public health this Handbook brings together both Western and Eastern scholarship creating a new global public health perspective suitable to face modern challenges in promoting the population s health This

Handbook is essential reading not only for students professionals and scholars of global public health and related fields but is also written to be accessible to those with a general interest in the health of Asia **Science of Societal Safety** Seiji Abe, Mamoru Ozawa, Yoshiaki Kawata, 2018-12-11 This open access book covers comprehensive but fundamental principles and concepts of disaster and accident prevention and mitigation countermeasures and recovery from disasters or accidents including treatment and care of the victims Safety and security problems in our society involve not only engineering but also social legal economic cultural and psychological issues The enhancement needed for societal safety includes comprehensive activities of all aspects from precaution to recovery not only of people but also of governments In this context the authors members of the Faculty of Societal Safety Science Kansai University conducted many discussions and concluded that the major strategy is consistent independently of the type and magnitude of disaster or accident being also the principle of the foundation of our faculty The topics treated in this book are rather widely distributed but are well organized sequentially to provide a clear understanding of the principles of societal safety In the first part the fundamental concepts of safety are discussed The second part deals with risks in the societal and natural environment Then follows in the third part a description of the quantitative estimation of risk and its assessment and management The fourth part is devoted to disaster prevention mitigation and recovery systems The final fifth part presents a future perspective of societal safety science Thorough reading of this introductory volume of societal safety science provides a clear image of the issues This is largely because the Japanese have suffered often from natural disasters and not only have gained much valuable information about disasters but also have accumulated a store of experience We are still in the process of reconstruction from the Great East Japan earthquake and the Fukushima nuclear power plant accident This book is especially valuable therefore in studying the safety and security of people and their societies *A Theory of Intergenerational Justice* Joerg Chet Tremmel, 2009-12-01 The appeal to our obligations to future generations is one of the most forceful emotional and effective arguments available to politicians and citizens and is the cornerstone of all modern policies aimed at sustainable development Yet the exact nature and extent of these obligations are unclear who owes what to whom exactly and why This highly accessible book provides an extensive and comprehensive overview of current research and theory about why and how we should protect future generations It exposes how and why the interests of people today and those of future generations are often in conflict and what can be done It rebuts critical concepts such as Parfit's non identity paradox and Beckerman's denial of any possibility of intergenerational justice The core of the book is the lucid application of a veil of ignorance to derive principles of intergenerational justice which show that our duties to posterity are stronger than is often supposed Tremmel's approach demands that each generation both consider and improve the well being of future generations To measure the well being of future generations Tremmel employs the Human Development Index rather than the metrics of utilitarian subjective happiness The book thus answers in detailed concrete terms the two most important questions of every theory of

intergenerational justice what to sustain and how much to sustain Ultimately this book provides a theory of intergenerational justice that is both intellectually robust and practical with wide applicability to law policy economics climate change and all other contexts that affect future generations **Hepato-Pancreato-Biliary Malignancies** Cataldo Doria,Jason N.

Rogart,2022-09-30 Hepato Pancreato Biliary cancers are increasing in incidence with pancreatic cancer now accounting for the third most cancer deaths in the United States Typically these malignancies as a group are managed by the same key providers comprising a multidisciplinary team This book is intended to provide a comprehensive review of the current knowledge in the field of hepato pancreato biliary malignancies focusing on the practical and clinical care of patients We take the approach of combining the collective expertise of an interventional gastroenterologist and a hepato pancreato biliary surgeon to provide the readers with accurate succinct and pragmatic information needed to formulate the most appropriate treatment plan for their patients with the aim of the best possible outcome Managing patients with these cancers continues to be challenging because of continued dismal survival rates Each section in this text is written by experts in their respective field summarizing the most state of the art contemporary diagnostic and therapeutic tools available in the field We believe this book will prove to be an invaluable comprehensive resource for all members of the multidisciplinary team caring for patients with hepato pancreato biliary malignancies Artificial Intelligence and Normative Challenges Angelos

Kornilakis,Georgios Nouskalis,Vassilis Pergantis,Themistoklis Tzimas,2023-11-20 Artificial intelligence AI both in its current comparatively limited form and even more so in its potential future forms such as general and superintelligence has raised both concerns and hopes Its actual and potential consequences are increasingly far reaching affecting almost every facet of human life on a collective and individual level from the use of mobile phones and social media to autonomous weapons and from the digitalization of knowledge and information to the patentability of AI innovations unexpected philosophical ontological political and legal questions continue to arise This book offers an insightful and essential guide to the scientific questions that are shaping humanity s present and future Presenting a collection of academic essays written by prominent scholars it addresses the major legal issues concerning AI its impact on a wide range of human behavior and the general legal response including questions on AI and legal personhood responsibility liability and culpability in the age of AI the challenges AI poses for intellectual property regimes human rights challenges and AI s impact on jus ad bellum and jus in bello Given its scope the book will appeal to researchers scholars and practitioners seeking a guide to this rapidly transforming landscape **Resources in Education** ,1998-07 *Natural Disasters and Sustainable Development* Riccardo

Casale,Claudio Margottini,2013-06-29 Natural disasters are a clear example of people living in conflict with the environment Disasters cause human social and environmental losses and sometimes even threaten geopolitical stability as in many less developed countries They are also a problem of global concern even when damage is local the mechanisms are often dependent on global meteorological climatic circulation Losses frequently affect several countries as could be seen in the floods in

central Europe in 2002 It is obvious that there is a clear need for a new approach capable of incorporating the prevention of natural disasters whilst mitigating strategies within the cycle of sustainable development There are no thematic disciplines or political boundaries limiting initiatives the integration of data providers data users information providers and information users in a global and holistic manner is the desired outcome of the new frontier This book falls into this new category multidisciplinary interventions and socio economic point of views are the basic inputs for a changing science implementing sustainable development for the benefit of citizens and society It is comprised of studies and investigations which explain natural processes and modelling as well as assessing hazards and risks and is rounded off with suggestions for sustainable development Thus reflecting the best results of research on this topic funded by the European Commission
