Teaching Academic Writing in European Higher Education Lennart Björk,Gerd Bräuer,L. Rienecker,Peter Stray Jörgensen,2005-12-30 DAVID R RUSSELL English Department of Iowa State University U S A I was fortunate to attend as a visitor from the U S the first European Association for the Teaching of Academic Writing EATAW conference in 2001 at Groningen I was struck by the similarities in the challenges higher education faces on both sides of the

Atlantic in terms of developing students academic writing and students learning through writing It is indeed an international problem But I was equally struck by the profound differences in responding to these challenges among nations institutions disciplines and even within disciplines The essays in this extraordinary volume address a growing demand for help with academic writing on the part of students and academic staff alike And they do so in ways that bring fresh approaches not only to Europeans who have only recently begun to study academic writing but also to researchers and academic staff in the U S where we have a century old tradition of attention to the problem but are much in need of these fresh approaches Academic writing has become a problem in higher education all around the world because higher education sits smack between two contradictory pressures On one end far more students and far more diverse students come streaming into higher education bringing in a far greater diversity of linguistic resources often interpreted as standards are falling as Frank Haacke Tente point out **Writing Term Papers with Cool New Digital Tools** Joe Greek,2013-12-15 In the not too distant past students were expected to turn in only handwritten or typed papers However with today s ease of access to the Internet and free applications teachers are now expecting students to go beyond the confines of text only productions Various online programs make it possible to create multi layered term papers that are rich in images audio and even video And most of these tools are free to use Students can now access their work from nearly anywhere that has an Internet connection In the case of collaborative research projects this same technology allows team members to work with each other even when they are in different locations A wide variety of online and offline tools techniques and tips to help students research write edit prepare and present term papers are discussed and explained here This revelatory guidebook to the latest in term paper technology also supports Common Core Standards for the reading of technical accounts and texts
