Krebs and Arnold Fleischmann introduce a framework that focuses on the role of institutions in establishing the political rules of the game, the representativeness of city government, the influence of participation in local democracy, and how each of these features influences the adoption and implementation of public policies. Part 1 lays the groundwork for the rest of the book by exploring the many meanings of urban, analyzing what local governments do, and providing a history of American urban development. Part 2 examines the organizations and procedures that are central to urban politics and policy making: intergovernmental relations, local legislatures, and the local executive branch. Part 3 looks at elections and voting, local campaigns, and non-voting forms of participation. The four chapters in Part 4 focus on the policy process and the delivery of local services, local government finances, building the city, economic development, land use, and housing, and policies affecting the quality of life, public safety, the environment, morality issues, and urban amenities. Krebs and Fleischmann bolster students' learning and skills with guiding questions at the start of each chapter, which ends with key terms, a summary, discussion questions, and research exercises. The appendix and website aid these efforts, as does a website for instructors.

**Creating Sustainable Community Programs** Mark R. Daniels, 2001-02-28 Public opinion polls consistently reveal the lack of confidence, disillusionment, and mistrust that citizens feel toward government. Daniels and his contributors believe that the relationship between citizens and their governments can be changed by facilitating greater citizen collaboration with government, particularly through local sustainable programs. As the case studies show, often sustainable community programs are created through grassroots movements that are initiated and managed by citizens themselves, bringing them in contact with their local elected and appointed officials. Unlike traditional programs that are administered by local officials on behalf of their citizens, once sustainable community programs are created, citizens administer their own programs in collaboration with local officials. The case studies look at a variety of sustainable programs, primarily in the United States, that help to deal with issues such as recycling, transportation, microcredit, site redevelopment, pollution, health care, and hunger. *Creating Sustainable Community Programs* is the first book on
