usually told as a story about markets land and wages The Enclosure of Knowledge reveals that it was also about books knowledge and expertise It argues that during the early modern period farming books were a key tool in the appropriation of the traditional art of husbandry possessed by farm workers of all kinds It challenges the dominant narrative of an agricultural enlightenment in which books merely spread useful knowledge by showing how codified knowledge was used to assert greater managerial control over land and labour The proliferation of printed books helped divide mental and manual labour to facilitate emerging social divisions between labourers managers and landowners The cumulative effect was the slow enclosure of customary knowledge By synthesising diverse theoretical insights this study opens up a new social history of
