Guide to Quality Management Systems for the Food Industry Ralph Early, 2012-12-06 Whenever I step into an aeroplane I cannot avoid considering the risks associated with flying Thoughts of mechanical failure pilot error and terrorist action fill my mind I try to reassure myself with statistics which tell me there is greater chance of injury crossing the road The moment the plane takes off I am resigned to my fate

placing faith in pilots who are highly qualified and superbly trained for the task of delivering me safely to my destination To be a passenger in an aeroplane is to express faith in the systems used by the airline It is to express a faith in the quality of the airline s organisation and the people who work within it The same is true of surgery Thoughts of mortality are difficult to avoid when facing the surgeon s knife However faith in the surgeon s training and skill faith in the anaesthetist and theatre technicians faith in the efficient resources and quality of the hospital all help to convince that there is little need to worry Apart from flying and surgery there are many facets of life which entail risk but knowing the risks we willingly place our confidence in others to deliver us safely In the consumption of food however few of us consider the risks Everyday if we are fortunate we eat food Food sustains and gives us pleasure Food supports our social interactions *Off-Premise Catering Management* Chris Thomas,Bill Hansen,2012-12-17 For nearly two decades Off Premise Catering Management has been the trusted resource professional and aspiring caterers turn to for guidance on setting up and managing a successful off premise catering business This comprehensive reference covers every aspect of the caterer s job from menu planning pricing food and beverage service equipment and packing delivery and set up logistics to legal considerations financial management human resources marketing sanitation and safety and more This new Third Edition has been completely revised and updated to include the latest industry trends and real life examples **Industry and Product Classification Manual** ,1977
