C. G. Vassiliou, 2013-03-01 Stochastic finance and financial engineering have been rapidly expanding fields of science over the past four decades mainly due to the success of sophisticated quantitative methodologies in helping professionals manage financial risks In recent years we have witnessed a tremendous acceleration in research efforts aimed at better comprehending modeling and hedging this kind of risk These two volumes aim to provide a foundation course on

applied stochastic finance They are designed for three groups of readers firstly students of various backgrounds seeking a core knowledge on the subject of stochastic finance secondly financial analysts and practitioners in the investment banking and insurance industries and finally other professionals who are interested in learning advanced mathematical and stochastic methods which are basic knowledge in many areas through finance Volume 1 starts with the introduction of the basic financial instruments and the fundamental principles of financial modeling and arbitrage valuation of derivatives Next we use the discrete time binomial model to introduce all relevant concepts The mathematical simplicity of the binomial model also provides us with the opportunity to introduce and discuss in depth concepts such as conditional expectations and martingales in discrete time However we do not expand beyond the needs of the stochastic finance framework Numerous examples each highlighted and isolated from the text for easy reference and identification are included The book concludes with the use of the binomial model to introduce interest rate models and the use of the Markov chain model to introduce credit risk This volume is designed in such a way that among other uses makes it useful as an undergraduate course

Innovations and Advanced Techniques in Computer and Information Sciences and Engineering Tarek Sobh, 2007-09-04 Innovations and Advanced Techniques in Computer and Information Sciences and Engineering includes a set of rigorously reviewed world class manuscripts addressing and detailing state of the art research projects in the areas of Computer Science Computer Engineering and Information Sciences Innovations and Advanced Techniques in Computer and Information Sciences and Engineering includes selected papers from the conference proceedings of the International Conference on Systems Computing Sciences and Software Engineering SCSS 2006 which was part of the International Joint Conferences on Computer Information and Systems Sciences and Engineering CISSE 2006 All aspects of the conference were managed on line not only the reviewing submissions and registration processes but also the actual conference Conference participants authors presenters and attendees only needed an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground breaking conference The on line structure of this high quality event allowed academic professionals and industry participants to contribute work and attend world class technical presentations based on rigorously refereed submissions live without the need for investing significant travel funds or time out of the office Suffice to say that CISSE received submissions from more than 70 countries for whose researchers this opportunity presented a much more affordable dynamic and well planned event to attend and submit their work to versus a classic on the ground conference The CISSE conference audio room provided superb audio even over low speed internet connections the ability to display PowerPoint presentations and cross platform compatibility the conferencing software runs on Windows Mac and any other operating system that supports Java In addition the conferencing system allowed for an unlimited number of participants which in turn granted CISSE the opportunity to allow all participants to attend all presentations as opposed to limiting the number of available seats for each session
