Moss, Susan M. Brookhart, 2015-01-21 Revolutionize the walkthrough to focus on the endgame of teaching student learning Authors Connie M Moss and Susan M Brookhart present the proven practice of formative walkthroughs that ask and answer questions that are specific to what the student is learning and doing Learn the value of having the observer examine the lesson from the student's point of view and seek evidence of seven key learning components A worthwhile lesson A learning target A performance of understanding Look for or success criteria Formative feedback Student self assessment Effective questioning Drawing upon their research and extensive work with K-12 teachers and administrators Moss and Brookhart delve into the learning target theory of action that debuted in *Learning Targets Helping Students Aim for Understanding* in Today's Lesson and show you how to develop a schoolwide collaborative culture that enhances the learning of teachers administrators coaches and students They present detailed examples of how formative walkthroughs work across grade levels and subject areas and provide useful templates that administrators and coaches can use to get started now Grounded in the beliefs that schools improve when educators improve and that the best evidence of improvement comes from what we see students doing to learn in every lesson every day *Formative Classroom Walkthroughs* offers a path to improvement that makes sense and makes a difference **Visible Learning for Mathematics, Grades K-12** John Hattie, Douglas

Fisher, Nancy Frey, Linda M. Gojak, Sara Delano Moore, William Mellman, 2016-09-15 Selected as the Michigan Council of Teachers of Mathematics winter book club book Rich tasks collaborative work number talks problem based learning direct instruction with so many possible approaches how do we know which ones work the best In *Visible Learning for Mathematics* six acclaimed educators assert it's not about which one it's about when and show you how to design high impact instruction so all students demonstrate more than a year's worth of mathematics learning for a year spent in school That's a high bar but with the amazing K-12 framework here you choose the right approach at the right time depending upon where learners are within three phases of learning surface deep and transfer This results in visible learning because the effect is tangible The

framework is forged out of current research in mathematics combined with John Hattie's synthesis of more than 15 years of education research involving 300 million students Chapter by chapter and equipped with video clips planning tools rubrics and templates you get the inside track on which instructional strategies to use at each phase of the learning cycle Surface learning phase When through carefully constructed experiences students explore new concepts and make connections to procedural skills and vocabulary that give shape to developing conceptual understandings Deep learning phase When through the solving of rich high cognitive tasks and rigorous discussion students make connections among conceptual ideas form mathematical generalizations and apply and practice procedural skills with fluency Transfer phase When students can independently think through more complex mathematics and can plan investigate and elaborate as they apply what they know to new mathematical situations To equip students for higher level mathematics learning we have to be clear about where students are where they need to go and what it looks like when they get there Visible Learning for Math brings about powerful precision teaching for K 12 through intentionally designed guided collaborative and independent learning

Teaching Mathematics in the Visible Learning Classroom, Grades 3-5 John Almarode, Douglas Fisher, Kateri Thunder, Sara Delano Moore, John Hattie, Nancy Frey, 2019-02-13 It could happen in the morning during homework review Or perhaps it happens when listening to students as they struggle through a challenging problem Or maybe even after class when planning a lesson At some point the question arises How do I influence students learning what's going to generate that light bulb aha moment of understanding In this sequel to the megawatt best seller Visible Learning for Mathematics John Almarode Douglas Fisher Nancy Frey John Hattie and Kateri Thunder help you answer that question by showing how Visible Learning strategies look in action in the mathematics classroom Walk in the shoes of elementary school teachers as they engage in the 200 micro decisions per minute needed to balance the strategies tasks and assessments seminal to high impact mathematics instruction Using grade leveled examples and a decision making matrix you'll learn to Articulate clear learning intentions and success criteria at surface deep and transfer levels Employ evidence to guide students along the path of becoming metacognitive and self directed mathematics achievers Use formative assessments to track what students understand what they don't and why Select the right task for the conceptual procedural or application emphasis you want ensuring the task is for the right phase of learning Adjust the difficulty and complexity of any task to meet the needs of all learners It's not only what works but when Exemplary lessons video clips and online resources help you leverage the most effective teaching practices at the most effective time to meet the surface deep and transfer learning needs of every student **180 Days of Social-Emotional**
