Mathematical Ideas Charles David Miller,Vern E. Heeren,1993 A textbook designed with a variety of students in mind and suited for several types of courses including mathematics for liberal arts students survey courses in mathematics and mathematics for prospective and in service elementary and middle school teachers Some 80% of the exercises are new to this edition which also sports extensive use of color and changes in format to create a fresh look Annotation copyright by Book News Inc Portland OR *Mathematical Recreations & Essays* W. W. Rouse Ball,H.S.M. Coxeter,1974-12-15 For over eighty years this delightful classic has provided entertainment through mathematical problems commonly known as recreations Although they often involve fundamental mathematical methods and notions their chief appeal is as games or puzzles rather than the usefulness of their conclusions This new edition upholds the original but the terminology and treatment of problems have been updated and much new material has been added There are new selections on polyominoes and the notion of dragon designs and a new chapter Introduction to Combinatorics Other topics dealt with in the fourteen chapters include arithmetical and geometrical recreations and problems polyhedra chess board recreations unicursal problems cryptography and cryptanalysis and calculating prodigies Since no knowledge of calculus or analytic geometry is necessary to enjoy the recreations this book will appeal widely to teachers of mathematics and students and to anyone who is mathematically inclined

Mathematical Understanding for Secondary Teaching M. Kathleen Heid,Patricia S. Wilson,Glendon W. Blume,2015-12-01 A perennial discussion about teacher development is the optimal content background for teachers In recent years that discussion has taken center stage in the work of mathematics education researchers mathematicians mathematics professional developers and mathematics education policymakers Much of the existing and prior work in this area has been directed toward mathematical knowledge for teaching at the elementary level The work described in this volume takes a sometimes neglected approach focusing on the dynamic nature of mathematical understanding rather than on a stable description of mathematical knowledge and on mathematics for secondary teaching rather than mathematics for

teaching at the elementary level The work reported in Mathematical Understanding for Secondary Teaching A Framework and Classroom Based Situations is a practice based response to the question of what mathematical understandings secondary teachers could productively use in their teaching For each of more than 50 events our team of almost 50 mathematics educators who were experienced mathematics teachers developed descriptions of the mathematics that teachers could use each of those descriptions consisting of the event and the mathematics related to the event is what we call a Situation We developed our Framework for Mathematical Understanding for Secondary Teaching MUST based on an analysis of our entire set of Situations We call the work practice based because the MUST framework is based on actual events that we witnessed in our observations of secondary mathematics practice Groups of mathematics teachers can use this volume to enhance their own understandings of secondary mathematics School leaders and professional developers in secondary mathematics will find our MUST Framework and Situations useful as they work with teachers in enhancing and deepening their understanding of secondary mathematics Mathematics teacher educators and mathematicians who teach mathematics to prospective and in service secondary teachers will be able to couch their mathematical discussions in the Situations examples that arise from secondary mathematics classrooms They will be able to use this volume as they design courses and programs that enhance mathematics from the perspectives identified in the MUST framework Policymakers and researchers can use our MUST framework as they consider the mathematics background needed by teachers
