*Senior Design Projects in Mechanical Engineering* Yongsheng Ma, Yiming Rong, 2021-11-10 This book offers invaluable insights about the full spectrum of core design course contents systematically and in detail This book is for instructors and students who are involved in teaching and learning of capstone senior design projects in mechanical engineering It consists of 17 chapters over 300 illustrations with many real world student project examples The main project processes are grouped into three phases i e project scoping and specification conceptual design and detail design and each has dedicated two chapters of process description and report content prescription respectively The basic principles and engineering process flow are well applicable for professional development of mechanical design engineers CAD CAM CAE technologies are commonly used within many project examples Thematic chapters also cover student teamwork organization and evaluation project management design standards and regulations and rubrics of course activity grading Key criteria of successful course accreditation and graduation attributes are discussed in details In summary it is a handy textbook for the capstone design project course in mechanical engineering and an insightful teaching guidebook for engineering design instructors

*Tribes and Territories in the 21st Century* Paul Trowler, Murray Saunders, Veronica Bamber, 2012-01-25 The tribes and territories metaphor for the cultures of academic disciplines and their roots in different knowledge characteristics has been used by those interested in university life and work since the early 1990s This book draws together research data and theory to show how higher education has gone through major change since then and how social theory has evolved in parallel Together these changes mean there is a need to re theorise academic life in a way which reflects changed contexts in universities in the twenty first century and so a need for new metaphors Using a social practice approach the editors and contributors argue that disciplines are alive and well but that in a turbulent environment where many other forces conditioning academic practices exist their influence is generally weaker than before However the social practice approach adopted in the book highlights how this influence is contextually contingent how disciplines are deployed in different ways for different purposes and with varying degrees of purchase This important book pulls together the latest thinking on the subject and offers a new framework for conceptualising the influences on academic practices in universities It brings together a distinguished group of scholars from across the world to address questions such as Have disciplines been displaced by inter disciplinaryity having outlived their usefulness Have other forces acting on the academy pushed disciplines into the background as factors shaping the practices of academics and students there How significant are disciplinary differences in teaching and research practices What is their significance in other areas of work in universities This timely book addresses a pressing concern in modern education and will be of great interest to university professionals managers and policy makers in the field of higher education

**Training Engineering Students for Modern Technological Advancement** Alves, Anabela Carvalho, van Hattum-Janssen, Natascha, 2021-12-17 Engineering education leads the preparation of the next generation of engineers This

is a difficult task as engineering practices rapidly evolve pressured by the technological advancements promoted by these same engineers Engineering schools are integrated into large and rigid higher education institutions HEI that are not known for their agility Nevertheless engineering educators must have the agility to go beyond HEI boundaries to close the gap between professional practice needs and engineering education Training Engineering Students for Modern Technological Advancement examines the role of engineering teachers in preparing the next generation of engineers and presents perspectives on active learning methods for engineering education As such it contributes to bypassing the compartmentalized way of course organization typical in many HEIs and prepares for more agile engineering education Covering topics such as game based teaching methods Industry 4 0 and management skills this book is a dynamic resource ideal for engineers engineering professors engineering students general educators engineering professionals academicians and researchers

**CARE** Mohd Fadzli Bin Abdollah,2014-10-09 This book is a compilation of Researcher Profiles from Centre for Advanced Research on Energy CARE Universiti Teknikal Malaysia Melaka Active Control in Mechanical Engineering Louis Jezequel,2021-07-01 The introduction of active control in structural dynamics has led to a number of developments over wide ranging industrial domains This work investigates this area and examines a number of topics including smart materials and structures new strategies of active control and its applications *4th Kuala Lumpur International Conference on Biomedical Engineering 2008* Noor Azuan Abu Osman,Prof. Ir. Dr Fatimah Ibrahim,Wan Abu Bakar Wan Abas,Herman Shah Abdul Rahman,Hua Nong Ting,2008-07-30 It is with great pleasure that we present to you a collection of over 200 high quality technical papers from more than 10 countries that were presented at the Biomed 2008 The papers cover almost every aspect of Biomedical Engineering from artificial intelligence to biomechanics from medical informatics to tissue engineering They also come from almost all parts of the globe from America to Europe from the Middle East to the Asia Pacific This set of papers presents to you the current research work being carried out in various disciplines of Biomedical Engineering including new and innovative researches in emerging areas As the organizers of Biomed 2008 we are very proud to be able to come up with this publication We owe the success to many individuals who worked very hard to achieve this members of the Technical Committee the Editors and the International Advisory Committee We would like to take this opportunity to record our thanks and appreciation to each and every one of them We are pretty sure that you will find many of the papers illuminating and useful for your own research and study We hope that you will enjoy yourselves going through them as much as we had enjoyed compiling them into the proceedings Assoc Prof Dr Noor Azuan Abu Osman Chairperson Organising Committee Biomed 2008 Modern Manufacturing Engineering J. Paulo Davim,2015-06-19 This book covers recent research and trends in Manufacturing Engineering The chapters emphasize different aspects of the transformation from materials to products It provides the reader with fundamental materials treatments and the integration of processes Concepts such as green and lean manufacturing are also covered in this book Advances in Engineering

Project, Production, and Technology James Olabode Bamidele Rotimi, Wajiha Mohsin Shahzad, Monty Sutrisna, Ravindu Kahandawa, 2024-08-17 This book contains a selection of papers from the 13th International Conference on Engineering Project and Production Management EPPM held in Auckland New Zealand from 29 November to 1 December 2023 The conference was organized by the School of Built Environment Massey University in collaboration with the EPPM Association The book comprises of quality assured theoretical discussions data analysis case studies and industry practices presented by global researchers and practitioners The conference theme was Creating capacity and capability re energizing supply chain for sustainable management of projects and productions in engineering and this volume focuses on papers related to engineering project production and technology The papers are comprehensive multidisciplinary and advanced and will be of interest to researchers and practitioners from various industries seeking the latest updates on the fields of engineering project and production management

**Implementing Communities of Practice in Higher Education** Jacquie McDonald, Aileen Cater-Steel, 2016-11-23 In this edited collection the authors pick up the communities of practice CoP approach of sharing practice in their reflection on the experience of taking their CoP vision from a dream to reality Their stories articulate the vision the passion and the challenge of working within and or changing existing institutional culture and practice The book discusses strategies that worked and considers the lessons learnt to inspire future dreamers and schemers The multiple perspectives provided in the case studies will assist higher education leaders as well as academic and professional staff in establishing or assessing CoPs The book offers insights into implementation strategies practical guidelines and ideas on how CoP theoretical underpinnings can be tailored to the higher education context

Shaping Our World Gretar Tryggvason, 2011-11 Engineering education is currently on the verge of a major transformation However while the need has been much discussed and several proposals for change have been put forward relatively little focus has been put on actual implementation of the proposed changes This book examines a program that has a long history of experimentation in engineering education Written by experts on the subject it describes specific topics with each chapter focusing on a specific innovation that has been carried out and explaining the educational pedagogy the learning benefit as well as the transferability of the approach
