

QUESTION 12 (18 marks)

Based on the Entity concept parameters detailed below:

IS POWER SUPPLY			IS SOLENOID	
U ₀	11.2V		U ₁	12V
I ₀	2A		I ₁	2.5A
C ₀	15 μ F		C ₁	10 μ F
L ₀	95mH	Cable	L ₁	5mH
L/R	50 μ H/10m			

Cable Parameters are:
 Capacitance = 0.1 μ F/m
 Inductance = 0.5 μ H/m
 L/R = 60 μ H/10m

- Given the capacitance values for the power supply, cable and solenoid, what will be the maximum permitted cable length? (2 Marks)
- In considering your answer for part a), and the inductance values of each component, what can the maximum length of the cable be? (2 Marks)
- The solenoid is controlled from an output of the relay mounted in the main enclosure on the machine. The output contact of the relay is not shown in the parameter drawing above. Does it need to be considered when evaluating the circuit parameters? (1 Mark)
- What information would you expect to be displayed on the nameplate of the solenoid? (2 Marks)
- The label on the solenoid has "T2" marked on it. What specific installation requirement would have to be in place for this solenoid to be used on a continuous miner? (1 Mark)

Harris, 2012-12-06 The selection of papers reprinted here traces the development of syntax from structural linguistics through transformational linguistics to operator gram mar

These three are not opposing views or independent assumptions about language. Rather they are successive stages of investigation into the word combinations which constitute the sentences of a language in contrast to those which do not. Throughout the goal has been to find the systematicities of these combinations and then to obtain each sentence in a uniform way from its parts. In structural analysis the parts were words simple or complex belonging to particular classes or particular sequences of these. In transformational analysis it is found that the parts of a sentence are elementary sentences whose parts in turn are simple words of particular classes. The relation between these two analyses is seen in the existence of an intermediate stage between the two presented in paper 4. From Morpheme to Utterance. A further intermediate stage is presented in the writer's String Analysis of Sentence Structure. *Papers on Formal Linguistics I* Mouton The Hague 1962 though it was developed after transformations as a syntactic representation for computational analysis. Generalization of both of these analyses leads to operator grammar in which each sentence is derived in a uniform way as a partial ordering of the originally simple words which enter into it. Each step least upper bound of the partial ordering of a word requiring another forms a sentence which is a component of the sentence being analyzed. Executive Documents, Minnesota ...
