Ford Fusion Hybrid User Guide Engine:

Advanced Automotive Engine Performance Michael Klyde, CDX Automotive, 2020-04-17 Advanced Automotive Engine Performance is designed to prepare novice technicians for the challenge of diagnosing today's highly technical electronic engine controls. Using this curriculum, learners will gain familiarity with the operation and variations of emissions systems and associated onboard monitors. The curriculum especially focuses on applying diagnostic strategy to and performing service procedures for emissions systems faults. Learners will also develop an understanding of IM testing and an ability to interpret IM test reports to aid in diagnosis. This objective-based curriculum will prepare learners for the challenges of servicing engine management systems in the shop today. This is a complete curriculum solution for Advanced Automotive Engine Performance. Online courseware is available and is rich in video and animation to support understanding of complex systems. This solution is available in print plus digital or digital only offerings providing eBook and online course pairing with mobile-friendly adaptability. Complete tests, tasksheets, and instructor resources make this curriculum easy to adopt and integrate into any automotive program.

The Arrival of the Electric Car CHRIS JOHNSTON, ED SOBEY, 2022-12-29 Second Edition Are you considering buying an electric vehicle? All of us are witnessing a once-in-a-lifetime transformation. For over one hundred years, gasoline and diesel fuels have powered ground transportation throughout the world. Now that is changing, and 2023 is the year when most people will recognize that change is happening. This book is a comprehensive, easy-to-understand overview of the passenger EV universe, including guides for buying and owning an electric car. The authors discuss choosing, owning, and driving an electric car, then explain the features, advantages, benefits, and limitations of over 45 EV models, including pickup trucks, SUVs, and sedans. If you have to have a car, make it an electric car. As this book makes clear, they are better than old-fashioned vehicles in every way. Bill McKibben, American environmentalist and climate change authority, co-founded 350.org and spearheaded the fossil fuel divestment campaign, resulting in endowments worth more than 15 trillion, stepping back from oil, gas, and coal. Thankfully, now that the electric vehicle R&D dark ages are coming to an end, and automakers around the world are charging up their EV programs, there's no doubt that we're about to see massive, valuable change in our transportation landscape. Sebastian Blanco, one of America's leading electric car journalists, who has been writing about EVs since 2006.
