YOUR FREE PLATFORM DEMO

Since 2008, although demo accounts attempt to replicate real markets, they operate in a simulated market environment. As such, there are key differences that distinguish them from real accounts, including but not limited to, the lack of slippage or real-time market liquidity, a delay in pricing, and the execution of some orders which may not be possible in real accounts. The operational limitations when executing orders in a demo environment may result in delays, execution slippage, and/or rejected orders under the absence of liquidity. There may be instances where margin requirements differ from those of live accounts as orders in demo accounts may not always receive full fills of real orders.
