Mobilia ,1984 *Organizational Identity in Practice* Lin Lerpold, Davide Ravasi, Johan van Rekom, Guillaume Soenen, 2012-11-12 Organizational Identity in Practice provides much needed in depth studies on what happens when aspirations claims and beliefs interact Given the practical needs of managers and students this exciting new text provides readers with more insight into what differences in these identity aspirations claims and beliefs really mean and what we may expect to occur when these differences become visible and what the outcomes of these processes are likely to be The diverse case studies illustrate how well known firms have dealt with the broad issues of who we are as an organization and what makes us similar or distinct from others and cover a broad range of industries firms and organizational forms The cases from companies such as Air France AT T Bang Olufsen BP Statoil Starbucks Scania and Alfa Romeo are focused on the broad topics of organizational identity strategy and the environment multiple and conflicting identities the construction of identities and how organizations express and project their identities The authors give scholars students and managers valuable ideas on how to deal with organizational identity challenges within firms Qualification for Computer-Integrated Manufacturing Felix Rauner, 2012-12-06 In this paper a nearly perfected concept of basic training in the field of Computer Integrated Manufacturing CIM has been explained With the help of detailed studies conducted in part by the Department of Technology and Education Department of Mechanical and Industrial Engineering University of Dortmund the necessity of basic training

at all levels for employees in Computer Integrated Manufacturing was verified. Then the new requirements for employees were indicated with respect to the ability to act. Moreover, the didactic demands of the concept for basic subject specific training were clearly stipulated. In summary, this concept has to include the invariant indispensable fundamental and exemplary contents and the basic options of CIM work organisation which are most important today and in the near future. Then a configuration was presented to meet these demands: the multimedia system of the CIM Learning Factory subsidised by the EC in the COMETT programme. The CIM Learning Factory consists of a well operating model factory where activities like job management, production control, design, manufacturing including loading, material transport and assembly as well as quality control and warehousing are flexibly shown in functional models and are controlled by means of cross linked computers. MPC during the training, the cross linked computer structure is used like a language laboratory. Two different teachware packages: the first for the target group of designers and decision makers, the second for skilled workers and plant management.

Flexible Firm Jakob Krause-Jensen, 2010. Bang Olufsen, the famous Danish producer of high end home electronics, is well known as an early exponent of value based management: the idea that there should be consistency in what the organisation does, a certain continuity between what the company develops and sells and the beliefs and practices of the employees. This study investigates how company values are communicated and the collective identity is articulated through the use of such concepts as culture, fundamental values and corporate religion as well as how employees negotiate these ideas in their daily working lives. As this book reveals, the identification of values meant to create cohesion and solidarity among employees came to symbolise and engender a split between the staff and the other parts of the company. By examining the rise and fall of the value based management approach, this volume offers the indispensable insight of anthropological enquiry to expose how social realities challenge conventional management strategies and therefore must be considered in the development of new management techniques.
